This Statement of Additional Information (the "SAI") supplements the prospectus dated November 1, 2020, as it may be amended from time to time (the "Prospectus"), offering Investor Shares, A Shares and Institutional Shares of the Auxier Focus Fund (the "Fund"), a separate series of Forum Funds (the "Trust"). This SAI is not a prospectus and should only be read in conjunction with the Prospectus. You may obtain the Prospectus without charge by contacting Atlantic Fund Administration, LLC (d/b/a Apex Fund Services) ("Apex Fund Services", "Apex" or "Administrator"), a wholly owned subsidiary of Apex US Holdings LLC, at the address or telephone number listed above. You may also obtain the Prospectus on the Adviser's website listed above. This SAI is incorporated by reference into the Fund's Prospectus. In other words, it is legally a part of the Prospectus.

Financial statements for the Fund for the year ended June 30, 2020 are included in the Annual Report to shareholders and are incorporated into this SAI by reference. Copies of the Annual Report and Semi-Annual Report may be obtained without charge and upon request, by contacting Apex Fund Services at the address or telephone number listed above. You may also obtain copies of the Fund's most recent Annual Report and Semi-Annual Report on the Adviser's website listed above.

KEY DEFINED TERMS

As used in this SAI, the following terms have the meanings listed.

“1933 Act” means the Securities Act of 1933, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“1940 Act” means the Investment Company Act of 1940, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“Adviser” means Auxier Asset Management LLC, the Fund’s investment adviser.

“Board” means the Board of Trustees of the Trust.

“Independent Trustees” means trustees who are not interested persons of the Trust, as defined in Section 2(a)(19) of the 1940 Act.

“IRC” means the Internal Revenue Code of 1986, as amended.

“IRS” means the Internal Revenue Service.

“NAV” means net asset value per share.

“RIC” means a domestic corporation qualified as a “regulated investment company” (as defined in Subchapter M of Chapter 1, Subtitle A, of the IRC).

“SEC” means the U.S. Securities and Exchange Commission.

INVESTMENT POLICIES AND RISKS

The Fund is a diversified open-ended series of the Trust. The Fund offers three classes of shares: Institutional Shares, Investor Shares and A Shares. This section supplements, and should be read in conjunction with, the Prospectus. The following are descriptions of the investments and investment practices that the Fund may pursue (in addition to those described in the Prospectus) and the associated risks. Please see the Prospectus for a discussion of the Fund's investment objective, principal investment strategies and principal risks.

A. Security Ratings Information

The Fund's investments in fixed-income, preferred stock and convertible securities are subject to the credit risk relating to the financial condition of the issuers of the securities. The Fund may make unlimited investments in investment grade fixed-income securities. The Fund's investments in non-investment grade securities are limited to 25% of its total net assets. Investment grade means rated in the top four long-term rating categories or unrated and determined by the Adviser to be of comparable quality.

Unrated securities may not be as actively traded as rated securities. The lowest ratings that are investment grade for corporate bonds, including convertible securities, are "Baa" in the case of Moody's Investors Service, Inc. ("Moody's") and "BBB" in the cases of Standard & Poor's Financial Services, LLC, a division of the McGraw-Hill Companies, Inc. ("S&P") and Fitch, Inc. ("Fitch"); for preferred stock the lowest ratings are "Baa" in the case of Moody's and "BBB" in the cases of S&P and Fitch. The Fund may retain securities whose ratings have declined below the lowest permissible rating category (or that are unrated and determined by the Adviser to be of comparable quality to securities whose ratings have declined below the lowest permissible rating category) if the Adviser determines that retaining such security is in the best interests of the Fund. Non-investment grade fixed-income securities (commonly known as "junk bonds") are inherently speculative and generally involve greater volatility of price than investment grade securities.

Moody's, S&P, Fitch and other organizations, together known as Nationally Recognized Statistical Rating Organizations ("NRSROs"), provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities is included in Appendix A to this SAI. The Adviser may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. An issuer's current financial condition may be better or worse than a rating indicates.

B. Equity Investments

1. General

Equity Securities. Equity securities consist of common stock, preferred stock, convertible preferred stock, depository receipts such as American Depositary Receipts ("ADRs"), rights and warrants. Common stocks, the most familiar type, represent an equity (ownership) interest in a corporation. Preferred stock, like common stock, represents an ownership interest in a corporation, but preferred stock will be paid before common stock in the event of liquidation. Convertible preferred stock is preferred stock that can be converted to common stock at a certain price within a defined period of time. Warrants are options to purchase equity securities at a specified price during a specific time period. Rights are similar to warrants, but normally have a short duration and are distributed by the issuer to its shareholders. Although equity securities have a history of long-term growth in value, their prices fluctuate based on changes in a company's financial condition and on overall market and economic conditions.

Preferred Stock. The Fund may invest in preferred stock, subject to the Fund's 25% limit on investments in non-investment grade securities. Preferred stock has a preference in liquidation (and, generally in dividends) over common stock but is subordinated in liquidation to debt. As a general rule, the market value of preferred stocks with fixed dividend rates and no conversion rights varies inversely with interest rates and perceived credit risk, with the price determined by the dividend rate. Some preferred stocks are convertible into other securities (typically, common stock) at a fixed price and ratio or upon the occurrence of certain events. The market price of convertible preferred stocks generally reflects an element of conversion value. Because many preferred stocks lack a fixed maturity date, these securities generally fluctuate substantially in value when interest rates change; such fluctuations often exceed those of long term bonds of the same issuer. Some preferred stocks pay an adjustable dividend that may be based on an index, formula, auction procedure or other dividend rate reset mechanism. In the absence of credit deterioration, adjustable rate preferred stocks tend to have more stable market values than fixed rate preferred stocks. All preferred stocks are also subject to the same types of credit risks of the issuer as corporate bonds. In addition, because preferred stock is junior to debt securities and other obligations of an issuer,

deterioration in the credit rating of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar yield characteristics.

Preferred stocks may be rated by S&P and Moody's, although there is no minimum rating which a preferred stock must have (and a preferred stock may not be rated) to be an eligible investment for the Fund. The Adviser expects, however, that generally the preferred stocks in which the Fund invests will be rated at least CCC by S&P or Caa by Moody's or, if unrated, of comparable quality in the opinion of the Adviser. Preferred stocks rated CCC by S&P are regarded as predominantly speculative with respect to the issuer's capacity to pay preferred stock obligations and represent the highest degree of speculation among securities rated between BB and CCC; preferred stocks rated Caa by Moody's are likely to be in arrears on dividend payments. Moody's rating with respect to preferred stocks does not purport to indicate the future status of payments of dividends. See Appendix A of this SAI for a further discussion of the ratings used by Moody's and S&P.

2. Risks

Equity Risks. The fundamental risk of investing in equity securities is that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions or factors beyond the control of the Adviser. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth. As a result, the return and net asset value of the Fund will fluctuate.

Securities in the Fund's portfolio may not increase as much as the market as a whole and some undervalued securities may continue to be undervalued for long periods of time. Although profits in some Fund holdings may be realized quickly, it is not expected that most investments will appreciate rapidly. If you invest in the Fund, you should be willing to accept the risks of the stock market and should consider an investment in the Fund only as a part of your overall investment portfolio.

C. Fixed-Income Investments

1. General

Debt Securities. The Fund may invest in short- and long-term debt securities, including municipal securities, convertible bonds and convertible debt securities.

Corporate Debt Securities. Corporate debt securities are bonds or notes issued by corporations and other business organizations, including business trusts, in order to finance their credit needs. Corporate debt securities include commercial paper, which consists of short term (usually from one to two hundred seventy days) unsecured promissory notes issued by corporations in order to finance their current operations. Fixed rate corporate debt securities tend to exhibit more price volatility during times of rising or falling interest rates than securities with floating rates of interest. This is because floating rate securities behave like short-term instruments in that the rate of interest they pay is subject to periodic adjustments based on a designated interest rate index. Fixed rate securities pay a fixed rate of interest and are more sensitive to fluctuating interest rates. In periods of rising interest rates the value of a fixed rate security is likely to fall. Fixed rate securities with short-term characteristics are not subject to the same price volatility as fixed rate securities without such characteristics. Therefore, they behave more like floating rate securities with respect to price volatility.

Many corporate debt obligations permit the issuers to call the security and thereby redeem their obligations earlier than the stated maturity dates. Issuers are more likely to call bonds during periods of declining interest rates. In these cases, if the Fund owns a bond which is called, the Fund will receive its return of principal earlier than expected, thus reducing income to the Fund.

Corporate zero coupon securities are: (1) notes or debentures which do not pay current interest and are issued at substantial discounts from par value; or (2) notes or debentures that pay no current interest until a stated date one or more years into the future, after which the issuer is obligated to pay interest until maturity, usually at a higher rate than if interest were payable from the date of issuance.

Variable and Floating Rate Securities. Certain debt securities have variable or floating rates of interest and, under certain limited circumstances, may have varying principal amounts. These securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to one or more interest rate indices or market interest rates (the "underlying index"). The interest paid on these securities is a function primarily of the underlying index upon

which the interest rate adjustments are based. These adjustments minimize changes in the market value of the obligation. Similar to fixed rate debt instruments, variable and floating rate instruments are subject to changes in value based on changes in market interest rates or changes in the issuer's creditworthiness. The rate of interest on these securities may be tied to obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities ("U.S. Government Securities") or indices on those securities and any other rate of interest or index. Certain variable rate securities pay interest at a rate that varies inversely to prevailing short-term interest rates (sometimes referred to as "inverse floaters"). Certain inverse floaters may have an interest rate reset mechanism that multiplies the effects of changes in the underlying index. This mechanism may increase the volatility of the security's market value while increasing the security's yield.

Many variable rate instruments include the right of the holder to demand prepayment of the principal amount of the obligation prior to its stated maturity and the right of the issuer to prepay the principal amount prior to maturity.

There may not be an active secondary market for any particular floating or variable rate instruments, which could make it difficult for the Fund to dispose of the instrument during periods that the Fund is not entitled to exercise any demand rights it may have. The Fund could, for this or other reasons, suffer a loss with respect to those instruments.

High Yield Debt Securities. Lower quality debt securities (commonly called "junk" or "high yield" bonds) are inherently speculative and involve greater risk of default or price change due to changes in the issuer's creditworthiness or changes in economic conditions. The Fund may invest up to 25% of its net assets in junk bonds rated at the time of purchase BB/Ba or lower by S&P or Moody's or, unrated, but determined to be of comparable quality by the Adviser. Junk bonds are subject to greater market risk and credit risk, or loss of principal and interest, than higher rated securities. Appendix A of this SAI describes the securities ratings used by various ratings agencies. The market prices of these securities will fluctuate over time, may fluctuate more than higher quality securities and may decline significantly in periods of general economic difficulty, which may follow periods of rising interest rates. The market for lower quality securities may be less liquid than the market for securities of higher quality. Furthermore, the liquidity of lower quality securities may be affected by the market's perception of their credit quality. Therefore, judgment may at times play a greater role in valuing these securities than in the case of higher quality securities, and it also may be more difficult during certain adverse market conditions to sell lower quality securities at their fair value to meet redemption requests or to respond to changes in the market.

Lower quality securities present risks based on payment expectations. For example, high yield bonds may contain redemption or call provisions. If an issuer exercises the provisions in a declining interest rate market, it could result in a decreased return for investors. Conversely, a high yield bond's value will decrease in a rising interest rate market, as will the value of the Fund's investment in such high yield bonds. If the Fund experiences unexpected net redemptions, this may force it to sell its high yield bonds, without regard to their investment merits, thereby decreasing the asset base upon which the Fund's expenses can be spread and possibly reducing the Fund's rate of return.

Since the risk of default is higher for lower quality securities and sometimes increases with the age of these securities, the Adviser's research and credit analysis are an integral part of managing any securities of this type held by the Fund. In considering investments for the Fund, the Adviser attempts to identify those issuers of high-yielding securities whose financial condition is adequate to meet future obligations, has improved or is expected to improve in the future. The Adviser's analysis focuses on relative values based on such factors as interest or dividend coverage, asset coverage, earning prospects, and the experience and managerial strength of the issuer.

U.S. Government Securities. The Fund may invest in U.S. Government Securities. The Fund considers U.S. Government Securities to include: (1) U.S. Treasury obligations (which differ only in their interest rates and maturities), (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are backed by the full faith and credit of the U.S. Government (such as securities issued by the Federal Housing Administration ("FHA"), Government National Mortgage Association ("GNMA"), the Department of Housing and Urban Development, the Export-Import Bank, the General Services Administration and the Maritime Administration and certain securities issued by the FHA and the Small Business Administration) and (3) securities that are guaranteed by agencies or instrumentalities of the U.S. Government but are not backed by the full faith and credit of the U.S. Government (such as the Federal National Mortgage Association ("FNMA"), the Federal Home Loan Mortgage Corporation ("FHLMC") or the Federal Home Loan Banks). These U.S. Government-sponsored entities, which although chartered and sponsored by Congress, are not guaranteed nor insured by the U.S. Government. They are supported by the credit of the issuing agency, instrumentality or corporation. The range of maturities of U.S. Government Securities is usually three months to thirty years. In general, the U.S. Government Securities tend to carry more interest rate risk than corporate bonds with similar maturities.

In September 2008, the Treasury and FHFA announced that FNMA and FHLMC had been placed in conservatorship. Since that time, FNMA and FHLMC have received significant capital support through Treasury preferred stock purchases, as well

as Treasury and Federal Reserve purchases of their mortgage -backed securities. The FHFA and the U.S. Treasury (through its agreement to purchase FNMA and FHLMC preferred stock) have imposed strict limits on the size of their mortgage portfolios. While the mortgage-backed securities purchase programs ended in 2010, the Treasury continued its support for the entities' capital as necessary to prevent a negative net worth through at least 2012. When a credit rating agency downgraded long-term U.S. Government debt in August 2011, the agency also downgraded FNMA and FHLMC's bond ratings, from AAA to AA+, based on their direct reliance on the U.S. Government (although that rating did not directly relate to their mortgage-backed securities). From the end of 2007 through the first quarter of 2014, FNMA and FHLMC required Treasury support of approximately \$187.5 billion through draws under the preferred stock purchase agreements. However, they have paid \$203 billion in senior preferred dividends to the Treasury over the same period. FNMA did not require any draws from Treasury from the fourth quarter of 2011 through the second quarter of 2014. Similarly, FHLMC did not require any draws from Treasury from the first quarter of 2012 through the second quarter of 2014. In April 2014, FHFA projected that FNMA and FHLMC would require no additional draws from Treasury through the end of 2015. However, FHFA also conducted a stress test mandated by the Dodd-Frank Act, which suggested that in a "severely adverse scenario" additional Treasury support of between \$84.4 billion and \$190 billion (depending on the treatment of deferred tax assets) might be required. No assurance can be given that the Federal Reserve or the Treasury will ensure that FNMA and FHLMC remain successful in meeting their obligations with respect to the debt and mortgage-backed securities that they issue.

In addition, the problems faced by FNMA and FHLMC, resulting in their being placed into federal conservatorship and receiving significant U.S. Government support, have sparked serious debate among federal policymakers regarding the continued role of the U.S. Government in providing liquidity for mortgage loans. In December 2011, Congress enacted the Temporary Payroll Tax Cut Continuation Act of 2011 which, among other provisions, requires that FNMA and FHLMC increase their single-family guaranty fees by at least 10 basis points and remit this increase to the Treasury with respect to all loans acquired by FNMA or FHLMC on or after April 1, 2012 and before January 1, 2022. Serious discussions among policymakers continue, however, as to whether FNMA and FHLMC should be nationalized, privatized, restructured or eliminated altogether. FNMA reported in the second quarter of 2014 that there was "significant uncertainty regarding the future of our company, including how long the company will continue to exist in its current form, the extent of our role in the market, what form we will have, and what ownership interest, if any, our current common and preferred stockholders will hold in us after the conservatorship is terminated and whether we will continue to exist following conservatorship." FHLMC faces similar uncertainty about its future role. FNMA and FHLMC also are the subject of several continuing legal actions and investigations over certain accounting, disclosure or corporate governance matters, which (along with any resulting financial restatements) may continue to have an adverse effect on the guaranteeing entities.

Holders of U.S. Government Securities not backed by the full faith and credit of the U.S. must look principally to the agency or instrumentality issuing the obligation for repayment and may not be able to assert a claim against the U.S. in the event that the agency or instrumentality does not meet its commitment. No assurance can be given that the U.S. Government would provide support if it were not obligated to do so by law. Neither the U.S. Government nor any of its agencies or instrumentalities guarantees the market value of the securities they issue.

The Fund may also invest in separated or divided U.S. Government Securities. These instruments represent a single interest, or principal, payment on a U.S. Government Security that has been separated from all the other interest payments and the security itself. When the Fund purchases such an instrument, it purchases the right to receive a single payment of a set sum at a known date in the future. The interest rate on such an instrument is determined by the price the Fund pays for the instrument when it purchases the instrument at a discount compared to its value at maturity. The amount of the discount the Fund will receive will depend upon the length of time to maturity of the separated U.S. Government Security and prevailing market interest rates when the separated U.S. Government Security is purchased. Separated U.S. Government Securities can be considered zero coupon investments because no payment is made to the Fund until maturity. The market values of these securities are much more susceptible to change in market interest rates than income-producing securities. These securities are purchased with original issue discount and such discount is includable as gross income to a Fund shareholder over the life of the security.

The Fund may also purchase certificates not issued by the U.S. Department of the Treasury, which evidence ownership of future interest, principal or interest and principal payments on obligations issued by the U.S. Department of the Treasury. The actual U.S. Treasury securities will be held by a custodian on behalf of the certificate holder. These certificates are purchased with original issue discount and are subject to greater fluctuations in market value, based upon changes in market interest rates, than income-producing securities.

Municipal Securities. Municipal securities are generally issued to finance public works, such as airports, bridges, highways, housing, hospitals, mass transportation projects, schools, streets, and water and sewer works. They are also issued to repay

outstanding obligations, to raise funds for general operating expenses, and to make loans to other public institutions and facilities.

The two principal classifications of municipal securities are “general obligation” and “revenue” bonds. General obligation bonds are secured by the issuer’s pledge of its full faith and credit and taxing power for the payment of principal and interest. Interest on and principal of revenue bonds, however, are payable only from the revenue generated by the facility financed by the bond or other specified sources of revenue. Revenue bonds do not represent a pledge of credit or create any debt of or charge against the general revenues of a municipality or public authority.

Municipal securities may carry fixed or floating rates of interest. Most municipal securities pay interest in arrears on a semi-annual or more frequent basis. However, certain securities, typically known as capital appreciation bonds or zero coupon bonds, do not provide for any interest payments prior to maturity. Such securities are normally sold at a discount from their stated value, or provide for periodic increases in their stated value to reflect a compounded interest rate. The market value of these securities is also more sensitive to changes in market interest rates than securities that provide for current interest payments.

Municipal securities in the form of notes generally are used to provide for short-term capital needs, in anticipation of an issuer’s receipt of other revenues or financing, and typically have maturities of up to three years. Such instruments may include Tax Anticipation Notes, Revenue Anticipation Notes, Bond Anticipation Notes, Tax and Revenue Anticipation Notes and Construction Loan Notes. The obligations of an issuer of municipal notes are generally secured by the anticipated revenues from taxes, grants or bond financing. An investment in such instruments, however, presents a risk that the anticipated revenues will not be received or that such revenues will be insufficient to satisfy the issuer’s payment obligations under the notes or that refinancing will be otherwise unavailable.

The municipal securities market is not subject to the same level of regulation as other sectors of the U.S. capital markets due to broad exemptions under the federal securities laws for municipal securities. As a result, there may be less disclosure, including current audited financial information, available about municipal issuers than is available for issuers of securities registered under the 1933 Act.

Convertible Securities. The Fund will not invest more than 5% of its net assets in each of the following: preferred stock, convertible preferred stock and convertible bonds. A convertible security is a bond or preferred stock, which may be converted at a stated price within a specific period of time into a specified number of shares of common stock of the same (or, sometimes, a different) issuer. Convertible securities are senior to common stock in a corporation’s capital structure, but usually are subordinated to non-convertible debt securities. While providing a fixed-income stream generally higher in yield than the income derived from a common stock (but lower than that afforded by a non-convertible debt security), convertible securities also may afford investors the opportunity, through their conversion feature, to participate in the capital appreciation of the common stock into which they are convertible.

In general, the market value of a convertible security is the higher of its investment value (its value as a fixed-income security) or its conversion value (the value of the underlying shares of common stock if the security is converted). As a fixed-income security, the market value of a convertible security generally increases when interest rates decline and generally decreases when interest rates rise; however, the price of a convertible security generally increases as the market value of the underlying stock increases, and generally decreases as the market value of the underlying stock decreases. Investments in convertible securities may entail less risk than investments in the common stock of the same issuer.

2. General Risks of Debt Securities

Yields on debt securities, including municipal securities, are dependent on a variety of factors, including the general conditions of the debt securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue. Debt securities with longer maturities tend to produce higher yields and are generally subject to greater price movements than obligations with shorter maturities. Some municipal securities may be supported by credit and liquidity enhancements such as letters of credit (which are not covered by federal deposit insurance) or puts or demand features of third party financial institutions, general domestic and foreign banks.

Certain debt securities may be subject to extension risk, which refers to the change in total return on a security resulting from an extension or abbreviation of the security’s maturity. Issuers may prepay fixed rate debt securities when interest rates fall. Issuers of debt securities are also subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on

its debt securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. Government) include FNMA and FHLMC. FNMA is a government-sponsored corporation owned by stockholders. It is subject to general regulation by the Federal Housing Finance Authority (“FHFA”). FNMA purchases residential mortgages from a list of approved seller/servicers that include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. FNMA guarantees the timely payment of principal and interest on pass-through securities that it issues, but those securities are not backed by the full faith and credit of the U.S. Government.

FHLMC is a government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned by stockholders. FHLMC issues Participation Certificates (“PCs”), which represent interests in mortgages from FHLMC’s national portfolio. FHLMC guarantees the timely payment of interest and ultimate collection of principal on the PCs it issues, but those PCs are not backed by the full faith and credit of the U.S. Government.

Interest Rate Risk. The market value of the interest-bearing debt securities held by a Fund will be affected by changes in interest rates. There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. The longer the remaining maturity (and duration) of a security, the more sensitive the security is to changes in interest rates. All debt securities, including U.S. Government Securities, can change in value when there is a change in interest rates. As a result, an investment in a Fund is subject to risk even if all debt securities in the Fund’s investment portfolio are paid in full at maturity.

Credit Risk. Changes in the ability of an issuer to make payments of interest and principal and in the markets’ perception of an issuer’s creditworthiness will also affect the market value of that issuer’s debt securities. The financial condition of an issuer of a debt security held by the Fund may cause it to default on interest or principal payments due on a security. This risk generally increases as security credit ratings fall. In addition, certain fixed-income securities may be subject to extension risk, which refers to the change in total return on a security resulting from an extension or abbreviation of the security’s maturity.

D. Investments in Foreign Securities

1. General

Foreign Securities. The Fund may invest in foreign equity and debt securities which may be denominated in foreign currencies. Investments in the securities of foreign issuers, including ADRs, may involve risks in addition to those normally associated with investments in the securities of U.S. issuers.

All foreign investments are subject to risks of: (1) foreign political and economic instability; (2) adverse movements in foreign exchange rates; (3) the imposition or tightening of exchange controls or other limitations on repatriation of foreign capital; and (4) changes in foreign governmental attitudes towards private investment, including potential nationalization, increased taxation or confiscation of the Fund’s assets.

In addition, interest and dividends payable on foreign securities may be subject to foreign withholding taxes, thereby reducing the income available for distribution to you. Some foreign brokerage commissions and custody fees are higher than those in the U.S. Foreign accounting, auditing and financial reporting standards differ from those in the U.S. and, therefore, less information may be available about foreign companies than is available about issuers of comparable U.S. companies. Foreign securities also may trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities.

Changes in foreign exchange rates will affect the U.S. dollar value of all foreign currency-denominated securities held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the U.S., many of which may be difficult, if not impossible, to predict.

Income from foreign securities will be received and realized in foreign currencies and the Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar after the Fund’s income has been earned and computed in U.S. dollars may require the Fund to liquidate portfolio securities to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund

incurs expenses in U.S. dollars and the time such expenses are paid, the Fund may be required to liquidate additional foreign securities to purchase the U.S. dollars required to meet such expenses.

Sovereign Debt Securities. The Fund may invest in sovereign debt obligations, including fixed and floating rate high yield sovereign debt obligations. Sovereign debt obligations are issued or guaranteed by a foreign government or one of its agencies, authorities, instrumentalities or political subdivisions. Investments in sovereign debt obligations involve special risks not present in corporate debt obligations.

Brexit. On June 23, 2016, the United Kingdom (“UK”) voted via referendum to leave the European Union (“EU”), commonly referred to as “Brexit”. On January 31, 2020, the UK officially withdrew from the EU and entered into a transition period until December 31, 2020, during which the UK will effectively remain in the EU from an economic perspective but will no longer have political representation on the EU parliament. During the transition period, the UK and EU will seek to negotiate and finalize a new trade agreement. It is possible that the transition period could be extended for up to two years. There is considerable uncertainty surrounding the outcome of the negotiations for a new trade agreements, and whether the United Kingdom’s withdrawal will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the economies of the United Kingdom and Europe may be negatively impacted, as may the broader global economy. Such uncertainty could result in increased market volatility and illiquidity and, more particularly, constrain the economic growth of countries whose economies rely on international trade and of companies that rely significantly on Europe for their business activities and revenues. Any additional exits of countries from the EU, or the potential for such exits, may cause additional market disruptions and introduce new legal and regulatory uncertainties. These developments could have a material adverse effect on the secondary market for securities in which the Fund invests and could result in significantly reduced liquidity.

2. Risks

Foreign Market Risks. Investments in foreign securities include the risk that the foreign government will impose restrictions on foreign currency transactions and rates of exchanges, will impose other regulations on exchange controls or will impose the seizure or nationalization of foreign assets. There is also the risk that there will be changes in the administrations or economic and monetary policies of related foreign governments, resulting in the possibility of expropriation decrees and other adverse foreign governmental action, or the imposition of new taxes. Foreign markets also tend to be less liquid and typically involve less government supervision of exchanges, brokers and issuers. Additionally, investors in foreign securities may encounter, among other things, difficulty in enforcing contractual obligations, delays in settlement of securities transactions and greater price volatility and investing in foreign securities will generally result in higher commissions than investing in similar domestic securities. Changes in foreign exchange rates will affect the U.S. dollar value of foreign currency denominated securities held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Depository Receipts. ADRs may involve risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards in some foreign markets and fluctuations in foreign currencies. The securities underlying ADRs are typically denominated (or quoted) in a currency other than U.S. dollars. As a result, changes in foreign currency exchange rates affect the value of the Fund’s portfolio. Generally, when the U.S. dollar rises in value against a foreign currency, a security denominated in that currency loses value because the currency is worth fewer U.S. dollars. Conversely, when the U.S. dollar decreases in value against a foreign currency, a security denominated in that currency gains value because the currency is worth more U.S. dollars. This risk means that a strong U.S. dollar will decrease those returns. In addition, the securities underlying ADRs trade on foreign exchanges at times when the U.S. markets are not open for trading.

As a result, the value of ADRs representing those underlying securities may change materially at times when the U.S. markets are not open for trading. Unsponsored depository receipts may be created without the participation of the foreign issuer. Holders of these receipts generally bear all the costs of the depository receipt facility, whereas foreign issuers typically bear certain costs in a sponsored depository receipt. The bank or trust company depository of an unsponsored depository receipt may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Accordingly, available information concerning the issuer may not be current and the prices of unsponsored depository receipts may be more volatile than the prices of sponsored depository receipts.

Sovereign Debt Securities. Investing in foreign sovereign debt securities will expose funds investing in such securities to the direct or indirect consequences of political, social or economic changes in the countries that issue the debt securities. The ability and willingness of sovereign obligors in developing and emerging countries or the governmental authorities that

control repayment of their external debt to pay principal and interest on such debt when due may depend on general economic and political conditions within the relevant country. Countries such as those in which the Fund may invest may experience high rates of inflation, high interest rates, exchange rate trade difficulties and extreme poverty and unemployment. These countries may also be characterized by political uncertainty or instability.

Other factors that may influence the ability or willingness to service debt include, but are not limited to: a country's cash flow situation, the availability of sufficient foreign exchange on the date a payment is due, the relative size of its debt service burden to the economy as a whole, and its government's policy towards the International Monetary Fund, the World Bank and other international agencies. The ability of a foreign sovereign obligor to make timely payments on its external debt obligations also will be strongly influenced by the obligor's balance of payments, including export performance, its access to international credit and investments, fluctuations in interest rates and the extent of its foreign reserves. A country whose exports are concentrated in a few commodities or whose economy depends on certain strategic imports could be vulnerable to fluctuations in international prices of these commodities or imports. To the extent that a country receives payment for its exports in currencies other than dollars, its ability to make debt payments denominated in dollars could be affected adversely. If a foreign sovereign obligor cannot generate sufficient earnings from foreign trade to service its external debt, it may need to depend on continuing loans and aid from foreign governments, commercial banks and multilateral organizations, and inflows of foreign investment. The commitment on the part of these foreign governments, multilateral organizations and others to make such disbursements may be conditioned on the government's implementation of economic reforms and/or economic performance and the timely service of its obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due, may result in the cancellation of such third parties' commitments to lend funds, which may further impair the obligor's ability or willingness to service its debts.

The cost of servicing external debt also generally will be affected adversely by rising international interest rates, as many external debt obligations bear interest at rates that are adjusted based upon international interest rates. The ability to service external debt also will depend on the level of the relevant government's international currency reserves and its access to foreign exchange. Currency devaluations may affect the ability of a sovereign obligor to obtain sufficient foreign exchange to service its external debt.

As a result of the foregoing, a governmental obligor may default on its obligations. If such an event occurs, the Fund may have limited legal recourse against the issuer and/or guarantor. Remedies must, in some cases, be pursued in the courts of the defaulting country itself, and the ability of the holder of foreign sovereign debt securities to obtain recourse may be subject to the political climate in the relevant country. In addition, holders of commercial bank debt will not contest payments to the holders of other foreign sovereign debt obligations in the event of default by a sovereign debtor.

Sovereign obligors in developing and emerging countries are among the world's largest debtors to commercial banks, other governments, international financial organizations and other financial institutions. These obligors have in the past experienced substantial difficulties in servicing their external debt obligations, which led to defaults on certain obligations and the restructuring of certain indebtedness. Holders of certain foreign sovereign debt securities may be requested to participate in the restructuring of such obligations and to extend further loans to their issuers. Restructuring arrangements have included, among other things, reducing and rescheduling interest and principal payments by negotiating new or amended credit agreements or converting outstanding principal and unpaid interest to Brady Bonds, and obtaining new credit to finance interest payments. "Brady Bonds" are U.S. dollar-denominated bonds issued by an emerging market, particularly those in Latin America, and collateralized by U.S. Treasury zero-coupon bonds. Brady Bonds and other foreign sovereign debt securities in which the Fund may invest may be subject to similar restructuring arrangements or to requests for new credit that may affect adversely the Fund's holdings. Furthermore, certain participants in the secondary market for such debt may be involved directly in negotiating the terms of these arrangements and may therefore have access to information not available to other market participants.

E. Other Investment Strategies

Borrowing and Reverse Repurchase Agreements. The Fund may borrow amounts up to 5% of its total assets to meet redemption requests and pledge assets to secure such borrowings, as necessary. Because the Fund's investments will fluctuate in value, whereas the interest obligations on borrowed funds may be fixed, during times of borrowing, the Fund's net asset value may tend to increase more than its investments increase in value, and decrease more when its investments decrease in value. In addition, interest costs on borrowings may fluctuate with changing market interest rates and may partially offset or exceed the return earned on the borrowed funds. Also, during times of borrowing under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

The Fund may enter into reverse repurchase agreements, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions. A reverse repurchase agreement is a transaction in which the Fund sells securities to a bank or securities dealer and simultaneously commits to repurchase the securities from the bank or dealer at an agreed upon date and at a price reflecting a market rate of interest unrelated to the sold securities. An investment of the Fund's assets in reverse repurchase agreements will increase the volatility of the Fund's NAV. A counterparty to a reverse repurchase agreement must be a primary dealer that reports to the Federal Reserve Bank of New York or one of the largest 100 commercial banks in the United States.

Repurchase Agreements. The Fund may enter into repurchase agreements. Repurchase agreements are transactions in which the Fund purchases securities from a bank or securities dealer and simultaneously commits to resell the securities to the bank or dealer at an agreed-upon date and at a price reflecting a market rate of interest unrelated to the purchased security. During the term of a repurchase agreement, the Fund's custodian, subcustodian or tri-party custodian maintains possession of the purchased securities and any underlying collateral, which is maintained at not less than 100% of the repurchase price. Repurchase agreements allow the Fund to earn income for periods as short as overnight, while retaining the flexibility to pursue longer-term investments.

Repurchase agreements involve credit risk. In the event that bankruptcy, insolvency or similar proceedings are commenced against a counterparty, the Fund may have difficulties in exercising its rights to the underlying securities. The Fund may incur costs and expensive time delays in disposing of the underlying securities, and it may suffer a loss. Failure by the other party to deliver a security or currency purchased by or lent by the Fund may result in a missed opportunity to make an alternative investment. Favorable insolvency laws that allow the Fund, among other things, to liquidate the collateral held in the event of the bankruptcy of the counterparty reduce counterparty insolvency risk with respect to repurchase agreements. The Fund will only enter a repurchase agreement with a seller that the Adviser believes presents minimal credit risk.

Short Sales. The Fund may make short sales of securities or maintain a short position, in each case only against-the-box. A short sale is "against-the-box" to the extent the Fund contemporaneously owns or has the right to obtain securities identical to those sold short without payment. In a short sale, the seller sells a borrowed security and has a corresponding obligation to the lender to deliver the identical security. The Fund may close the short sale by purchasing the security in the open market at the market price. If the proceeds received from the short sale (less the interest charges) exceed the amount paid for the security, the Fund will incur a gain on the transaction. If the proceeds received from the short sale (less the interest charges) are less than the amount paid for the security, the Fund will incur a loss on the transaction. Employing a long/short strategy is speculative and involves a high degree of risk, particularly when used for non-hedging purposes. The Fund will not make short sales if, as a result, more than 20% of the Fund's net assets would be held as collateral for short sales.

Foreign Currency Transactions. The Fund may temporarily hold funds in bank deposits in foreign currencies during the completion of investment programs. Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another.

Temporary Defensive Position and Cash Investments. In order to respond to adverse market, economic, political or other conditions, the Fund may assume a temporary defensive position that is inconsistent with its principal investment objective and/or strategies and invest, without limitation, in cash or money market instruments (including commercial paper, certificates of deposit, banker's acceptances and time deposits). A defensive position, taken at the wrong time, may have an adverse impact on the Fund's performance. The Fund may be unable to achieve its investment objective during the employment of a temporary defensive measure. The Fund can also invest in cash and high quality cash equivalents pending settlement of investments.

Money market instruments usually have maturities of one year or less and fixed rates of return. The money market instruments in which the Fund may invest include short-term U.S. Government Securities, commercial paper, bankers' acceptances, certificates of deposit, interest-bearing savings deposits of commercial banks, repurchase agreements concerning securities in which the Fund may invest and money market mutual funds. The Fund will invest in money market mutual funds in compliance with the 1940 Act.

The money market instruments in which the Fund may invest may have variable or floating rates of interest. These obligations include master demand notes that permit investment of fluctuating amounts at varying rates of interest pursuant to a direct arrangement with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days' notice. These obligations generally are not traded, nor generally is there an established secondary market for these obligations. To the extent a demand note does not have a 7-day or shorter demand feature and there is no readily available market for the obligation, it is treated as an illiquid security.

F. Illiquid Securities

Generally, an illiquid security is any investment that may not reasonably be expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid securities may be difficult for a Fund to value or dispose of due to the absence of an active trading market. Illiquid securities include unregistered and “restricted securities,” and repurchase agreements maturing in greater than seven days.

“Restricted securities” generally are securities that may be resold to the public pursuant to an effective registration statement under the 1933 Act or an exemption from registration. Regulation S under the 1933 Act is one exemption from registration. It permits, under certain circumstances, the resale of restricted securities in offshore transactions. Rule 144A under the 1933 Act is another exemption. It permits the resale of certain restricted securities to qualified institutional buyers.

Since its adoption by the SEC in 1990, Rule 144A has facilitated trading of restricted securities among qualified institutional investors. To the extent restricted securities held by a Fund qualify under Rule 144A and an institutional market develops for those securities, the Fund expects that it will be able to dispose of the securities without registering the resale of such securities under the 1933 Act. However, to the extent that a robust market for such 144A securities does not develop, or a market develops but experiences periods of illiquidity, investments in Rule 144A securities could increase the level of a Fund’s illiquidity.

Where an exemption from registration under the 1933 Act is unavailable, or where an institutional market is limited, a Fund may, in certain circumstances, be permitted to require the issuer of restricted securities held by the Fund to file a registration statement to register the resale of such securities under the 1933 Act. In such case, the Fund will typically be obligated to pay all or part of the registration expenses, and a considerable period may elapse between the decision to sell and the time the Fund may be permitted to resell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, or the value of the security were to decline, the Fund might obtain a less favorable price than prevailed when it decided to sell. Restricted securities for which no market exists are priced at fair value pursuant to a methodology approved by the Board.

Determination of Liquidity. Rule 22e-4 under the 1940 Act requires, among other things, that the Fund establish a liquidity risk management program (“LRMP”) that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines “liquidity risk” as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of the remaining investors’ interests in the fund. The Fund has implemented a LRMP to meet the relevant requirements. Additionally, the Board, including a majority of the Independent Trustees, approved the designation of the Fund’s LRMP administrator to administer such program and will review no less frequently than annually a written report prepared by the LRMP administrator that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a “highly liquid investment,” “moderately liquid investment,” “less liquid investment” or “illiquid investment.” The liquidity risk classifications of the Fund’s investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that a Fund investment is deemed to be an “illiquid investment” or a “less liquid investment,” the Fund can expect to be exposed to greater illiquidity risk.

G. Investment Company Securities (including Exchange-Traded Funds) and Exchange Traded Products

The Fund may invest in closed-end investment companies, including exchange-traded funds (“ETFs”) and money market funds.

Under Section 12(d)(1)(A) of the 1940 Act, however, the Fund’s investments in such securities are generally limited to 3% of the outstanding voting stock of any one company, 5% of the Fund’s total assets in any one company, and 10% of the Fund’s total assets in investment companies generally. The Fund’s investments in money market funds, which are discussed below in “Temporary Defensive Position and Cash Investments,” and shares of ETFs that have received exemptive relief from the SEC to permit registered funds to invest in excess of these limitations, are not subject to the percentage limitations set forth above. In addition, under Section 12(d)(1)(F) of the 1940 Act, the Fund may invest more than 5% of its total assets in another investment company and more than 10% of its total assets among multiple investment companies, provided that it limits any sales load to 1.5% and is willing to comply with certain redemption and voting restrictions.

Most ETFs are investment companies, trusts or partnerships whose shares are bought and sold on a securities exchange. An ETF typically holds a portfolio of securities designed to track a particular market segment or index. The Fund could purchase an ETF to gain exposure to a portion of the U.S. or foreign market or for the purposes of hedging its investments.

The Fund may invest also in Exchange Traded Products (“ETPs”) other than ETFs, including Exchange Traded Notes (“ETNs”). ETNs are similar to ETFs in that they may provide returns that track an index; ETNs are different from ETFs, however, in one important respect. They are not secured by an underlying pool of assets, but rather are notes (or debt securities) secured only by the ability of the issuer to pay. ETN shares are subject to the same risks described for “Corporate Debt Obligations” above. Other ETPs, like ETFs, invest in a pool of assets and are traded on an exchange. ETPs that are neither ETFs nor ETNs are generally organized as commodity pools registered under the Commodity Exchange Act or as grantor trusts and are not registered as investment companies under the 1940 Act. This is due to the fact that they invest in, for example, commodities or currencies rather than securities. There are certain risks associated with investments in such ETPs, which, if applicable, are detailed below in “Taxation – Certain Tax Rules Applicable to the Fund’s Transactions - Investments in LLCs, LPs and Grantor Trusts.”

The Fund, as a shareholder of another investment company (including an ETF) or ETP, will bear its pro-rata portion of such vehicle’s fees and expenses, in addition to its own fees and expenses. In addition, it will be exposed to the investment risks associated with the other investment company or ETP which generally reflect the risks of its strategy underlying holdings. If the investment company or ETP fails to achieve its investment objective, the Fund may be adversely affected.

ETPs (including ETFs) are listed on national stock exchanges and are traded like stocks listed on an exchange. As a result, investments in ETPs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund, and ETP shares potentially may trade at a discount or a premium to the ETP’s NAV. In addition, ETPs are subject to the risk that trading of an ETP’s shares may be halted if the listing exchange’s officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide “circuit breakers” (which are tied to large decreases in stock prices) halts stock trading generally. A lack of liquidity in ETP shares could result in its market price being more volatile than the underlying portfolio of securities. Finally, because the value of ETP shares depends on the demand in the market, the Fund may not be able to liquidate them at the most optimal time, adversely affecting the Fund’s performance.

H. Cybersecurity

The Fund, and its service providers, may be prone to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting the Fund or its third-party service providers may adversely impact the Fund. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. While the Fund’s service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by its service providers or any other third parties whose operations may affect a Fund or its shareholders. Similar types of cyber security risks are also present for issues or securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund’s investment in such companies to lose value.

I. Large Shareholder Transaction Risk

The Fund may experience adverse effects when a large shareholder redeems or purchases large amounts of shares of the Fund. Such redemptions may cause the Fund to sell securities at times when it would not otherwise do so, disrupt the Fund’s operations, or borrow money (at a cost to the Fund), which may negatively impact the Fund’s performance and liquidity. Similarly, large purchases may adversely affect the Fund’s performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs.

J. Market Turbulence

The greatest risk of investing in a mutual fund is that its returns will fluctuate, and you could lose money. Turbulence in the financial sector may result in an unusually high degree of volatility in the financial markets. Both domestic and foreign equity markets have experienced significant volatility and turmoil, with issuers that have exposure to the real estate, mortgage and credit markets particularly affected. It is uncertain whether or for how long these conditions could occur.

Reduced liquidity in credit and fixed-income markets may adversely affect many issuers worldwide. This reduced liquidity may result in less money being available to purchase raw materials, goods and services from emerging markets, which may, in turn, bring down the prices of these economic staples. It may also result in emerging market issuers having more difficulty obtaining financing, which may, in turn, cause a decline in their stock prices. These events and possible market turbulence may have an adverse effect on the Fund.

The financial markets in which the Fund invests are subject to price volatility that could cause losses in a Fund. Market volatility may result from varied predictable and unpredictable factors. The recent outbreak of the novel coronavirus, first detected in December 2019, has resulted in disruptions to the economies of many nations, individual companies and the markets in general, the impact of which cannot necessarily be foreseen at the present time. The impact of the novel coronavirus, and other such future infectious diseases in certain regions or countries may perform better or worse due to the nature or level of their public health response or due to other factors. Health crises caused by the recent coronavirus outbreak or future infectious diseases may exacerbate other pre-existing political, social and economic risks in certain countries.

The impact of the outbreak may be short term or may last for an extended period of time. This pandemic and other epidemics and pandemics that may arise in the future could result in continued volatility in the financial markets and lead to increased levels of Fund redemptions, which could have a negative impact on the Fund and could adversely affect a Fund's performance, resulting in losses to your investment.

INVESTMENT LIMITATIONS

The Trust, on behalf of the Fund, has adopted the following investment policies which are fundamental policies that may not be changed without the affirmative vote of a majority of the outstanding voting securities of the Fund. "A majority of the outstanding voting securities of the Fund," as defined by the 1940 Act, means the affirmative vote of the lesser of (1) more than 50% of the outstanding shares of the Fund, or (2) 67% or more of the shares present at a meeting, if more than 50% of the outstanding shares are represented at the meeting in person or by proxy.

The Fund's investment objective is a non-fundamental policy. Non-fundamental policies may be changed by the Board without shareholder approval.

For purposes of the Fund's investment limitations, all percentage limitations apply immediately after an investment. Except with respect to borrowing money, if a percentage limitation is adhered to at the time of an investment, a later increase or decrease in the percentage resulting from any change in value or net assets will not result in a violation of such restrictions. If at any time the Fund's borrowings exceed its limitations due to a decline in net assets, such borrowings will be reduced within three days (excluding Sundays and holidays) to the extent necessary to comply with the limitation.

Fundamental Limitations. The Fund has adopted the following investment limitations that cannot be changed by the Board without shareholder approval.

1. Diversification

With respect to 75% of its assets, the Fund will not purchase securities, other than U.S. Government Securities, of any one issuer, if: (1) more than 5% of the Fund's total assets taken at market value would at the time of purchase be invested in the securities of that issuer; or (2) such purchase would at the time of purchase cause the Fund to hold more than 10% of the outstanding voting securities of that issuer.

2. Borrowing Money

The Fund will not borrow money, except: (a) from a bank, provided that immediately after such borrowing there is asset coverage of 300% on all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions.

3. Senior Securities

The Fund will not issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act.

4. Underwriting

The Fund will not act as underwriter of securities issued by other persons. This limitation is not applicable to the extent that, in connection with the disposition of portfolio securities (including restricted securities), the Fund may be deemed an underwriter under certain federal securities laws.

5. Real Estate

The Fund will not purchase or sell real estate. This limitation is not applicable to investments in marketable securities, which are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).

6. Commodities

The Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options or futures contracts, from investing in

securities or other instruments backed by commodities or from investing in companies, which are engaged in commodities business or have a significant portion of their assets in commodities.

7. Loans

The Fund will not make loans to other persons, except: (a) by loaning portfolio securities; (b) by engaging in repurchase agreements; or (c) by purchasing nonpublicly offered debt securities. For purposes of this limitation, the term “loans” shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

8. Concentration

The Fund will not invest 25% or more of its total assets in a particular industry. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

Additional Information Regarding Fundamental Limitations

With respect to the percentages adopted by the Trust, on behalf of the Fund, as maximum limitations on its investment policies and limitations, an excess above the fixed percentage will not be a violation of the policy or limitation unless the excess results immediately and directly from the acquisition of any security or the action taken. This paragraph does not apply to the policy regarding borrowing money set forth above.

Notwithstanding any of the foregoing limitations, any investment company, whether organized as a trust, association or corporation, or a personal holding company, may be merged or consolidated with or acquired by the Fund, provided that if such merger, consolidation or acquisition results in an investment in the securities of any issuer prohibited by said paragraphs, the Trust shall, on behalf of the Fund and within ninety days after consummation of such merger, consolidation or acquisition, dispose of all the securities of such issuer so acquired or such portion thereof as shall bring the total investment therein within the limitations imposed by said paragraphs above as of the date of consummation.

With respect to the fundamental policy relating to borrowing money set forth in (2) above, the 1940 Act permits the Fund to borrow money in amounts of up to one-third of the Fund’s total assets, at the time of borrowing, from banks for any purpose (the Fund’s total assets include the amounts being borrowed). To limit the risks attendant to borrowing, the 1940 Act requires the Fund to maintain at all times an “asset coverage” of at least 300% of the amount of its borrowings (not including borrowings for temporary purposes in an amount not exceeding 5% of the value of the Fund’s total assets). In the event that such asset coverage falls below this percentage, the Fund is required to reduce the amount of its borrowings within three days (not including Sundays and holidays) so that the asset coverage is restored to at least 300%. Asset coverage means the ratio that the value of the Fund’s total assets (including amounts borrowed), minus liabilities other than borrowings, bears to the aggregate amount of all borrowings.

With respect to the fundamental policy relating to issuing senior securities set forth in (3) above, “senior securities” are defined as Fund obligations that have a priority over the Fund’s shares with respect to the payment of dividends or the distribution of Fund assets. The 1940 Act prohibits the Fund from issuing any class of senior securities or selling any senior securities of which it is the issuer, except that the Fund is permitted to borrow from a bank if consistent with the fundamental policy set forth in (2) above.

With respect to the fundamental policy relating to investing in real estate set forth in (5) above, the Fund may, to the extent permitted by applicable law, invest in securities or other instruments directly or indirectly secured by real estate and invest in securities or other instruments issued by issuers that invest in real estate. Investments in securities of issuers that are exposed to or invested in the real estate business will not be deemed to be a purchase or sale of real estate.

With respect to the fundamental policy relating to making loans set forth in (7) above, the 1940 Act does not prohibit the Fund from making loans; however, SEC staff interpretations currently prohibit registered investment companies from lending more than one-third of their total assets, except through the purchase of debt obligations.

A. Board of Trustees

The Trust is governed by its Board of Trustees. The Board oversees the management and operations of the Trust and the Fund, in accordance with federal law, Delaware law and the stated policies of the Fund. The Board oversees the Trust's officers and service providers, including the Adviser, which is responsible for the management of the day-to-day operations of the Fund based on policies and agreements reviewed and approved by the Board. In carrying out these responsibilities, the Board regularly interacts with and receives reports from senior personnel of service providers and the Trust's Chief Compliance Officer ("CCO"). The Board also is assisted by the Trust's independent auditor (which reports directly to the Trust's Audit Committee), independent counsel and other experts as appropriate. The Trustees serve until their respective successors have been elected and qualified or until their earlier death, resignation or removal.

The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor does it share the same investment adviser with any other series. As a result, the term "Fund Complex" applies only to the Fund.

Board Structure and Related Matters. Independent Trustees constitute at least a majority of the Board members. As of January 1, 2018, four of the Trust's Trustees retired and were replaced by four new Trustees, who were previously elected by shareholders. An existing Independent Trustee serves as Independent Chair of the Board. The Independent Chair's responsibilities include: setting an agenda for each meeting of the Board; presiding at all meetings of the Board and Independent Trustees; and serving as a liaison with other Trustees, the Trust's officers, other management personnel and counsel to the Fund. The Independent Chair also performs such other duties as the Board may from time to time determine.

The Trustees discharge their responsibilities collectively as a Board, as well as through Board committees, each of which operates pursuant to a charter or procedures approved by the Board that delineates the specific responsibilities of that committee. The Board has established three standing committees: the Audit Committee, the Nominating Committee and the Qualified Legal Compliance Committee. The members and responsibilities of each Board committee are summarized below.

The Board periodically evaluates its structure and composition as well as various aspects of its operations. The Board believes that its leadership structure, including its Independent Chair position and its committees, is appropriate for the Trust in light of, among other factors, the asset size and nature of the Fund, the number of funds overseen by the Board, the arrangements for the conduct of the Fund's operations, the number of Trustees and the Board's responsibilities. On an annual basis, the Board conducts a self-evaluation that considers, among other matters, whether the Board and its committees are functioning effectively and whether, given the size and composition of the Board and each of its committees, the Trustees are able to oversee effectively the number of funds.

The Board holds four regularly scheduled in-person meetings each year. The Board may hold special meetings, as needed, either in person or by telephone, to address matters arising between regular meetings. At least once per quarter, during a regularly scheduled in-person meeting of the Board, the Independent Trustees meet without the presence of interested Trustees.

The Trustees are identified in the table below, which provides information as to their principal business occupations held during the last five years and certain other information. Each Trustee serves until his or her death, resignation or removal. The address for all Trustees is c/o Apex Fund Services, Three Canal Plaza, Suite 600, Portland, Maine 04101. John Y. Keffer, a former Trustee of the Trust, has been appointed as a Trustee Emeritus by the Board. As Trustee Emeritus, Mr. Keffer will not have a vote with respect to Trust matters; however, Mr. Keffer may attend Board meetings.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Series in Fund Complex Overseen By Trustee	Other Directorships Held By Trustee During Past Five Years
Independent Trustees					
David Tucker Born: 1958	Trustee; Chairman of the Board	Since 2011 and Chairman since 2018	Director, Blue Sky Experience (a charitable endeavor) since 2008; Senior Vice President & General Counsel, American Century Companies (an investment management firm) 1998-2008.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
Mark D. Moyer Born: 1959	Trustee	Since 2018	Chief Financial Officer, Freedom House (a NGO advocating political freedom and democracy) since 2017; independent consultant providing interim CFO services, principally to non-profit organizations, 2011-2017.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
Jennifer Brown-Strabley Born: 1964	Trustee	Since 2018	Principal, Portland Global Advisors (a registered investment adviser), 1996-2010.	1	Trustee, Forum Funds II and U.S. Global Investors Funds
Interested Trustees⁽¹⁾					
Jessica Chase Born: 1970	Trustee	Since 2018	Director, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019.	1	Trustee, Forum Funds II and U.S. Global Investors Funds

⁽¹⁾ Jessica Chase is currently an interested person of the Trust, as defined in the 1940 Act, due to her affiliation with Apex Fund Services and her role as President of the Trust.

In addition to the information set forth in the table above, each Trustee possesses other relevant qualifications, experience, attributes or skills. The following provides additional information about these qualifications and experience.

David Tucker: Mr. Tucker has extensive experience in the investment management industry, including experience in senior management, legal and compliance roles at two large mutual fund complexes; service on various committees of the Investment Company Institute (“ICI”); and director of ICI Mutual (a mutual insurance company sponsored by the investment company industry), including service as chairman of the underwriting, risk and fraud committees of ICI Mutual’s board of directors. Mr. Tucker actively serves charitable organizations in the metropolitan Kansas City area.

Mark D. Moyer: Mr. Moyer has extensive experience with finance. He currently serves as chief financial officer for a non-governmental organization and has served as chief financial officer for an integrated media company and several not-for-profit organizations. Mr. Moyer has also served as an adjunct professor of accounting at Fairfield University.

Jennifer Brown-Strabley: Ms. Brown-Strabley has extensive experience in the financial services and investment management industry, including institutional sales experience in global fixed-income and related quantitative research. Ms. Brown-Strabley also has experience in business start-up and operations and as a former principal of a registered investment adviser, for which she continues to provide consulting advice from time to time.

Jessica Chase: Ms. Chase has extensive experience in the fund services industry, including senior management roles overseeing the mutual fund and hedge fund accounting operations for a large bank provider and business development for a

fund service provider specializing in third-party mutual fund administration. Ms. Chase serves as principal executive officer for certain investment companies.

Risk Oversight. Consistent with its responsibility for oversight of the Trust and the Fund, the Board oversees the management of risks relating to the administration and operation of the Trust and the Fund. The Adviser, as part of its responsibilities for the day-to-day operations of the Fund, is responsible for day-to-day risk management. The Board, in the exercise of its reasonable business judgment, also separately considers potential risks that may impact the Fund. The Board performs this risk management oversight directly and, as to certain matters, through its committees (described below) and through the Independent Trustees. The following provides an overview of the principal, but not all, aspects of the Board’s oversight of risk management for the Trust and the Fund.

In general, the Fund’s risks include, among others, investment risk, valuation risk, compliance risk and operational risk. The Board has adopted, and periodically reviews, policies and procedures designed to address these and other risks to the Trust and the Fund. In addition, under the general oversight of the Board, the Adviser and other service providers have themselves adopted a variety of policies, procedures and controls designed to address particular risks. Different processes, procedures and controls are employed with respect to different types of risks. Further, the Adviser oversees and regularly monitors the investments, operations and compliance of the Fund’s investments.

The Board also oversees risk management for the Trust and the Fund through review of regular reports, presentations and other information from officers of the Trust and other persons. Senior officers of the Trust, senior officers of the Adviser and the CCO regularly report to the Board on a range of matters, including those relating to risk management. In this regard, the Board periodically receives reports regarding other service providers to the Trust, either directly or through the CCO. On at least a quarterly basis, the Independent Trustees meet with the CCO to discuss matters relating to the Fund’s compliance program. Further, at least annually, the Board receives a report from the CCO regarding the effectiveness of the Fund’s compliance program.

The Board receives regular reports from a Valuation Committee, composed of the Principal Executive Officer, the Principal Financial Officer, the CCO, a senior fund accounting member, a senior representative from the Administrator’s regulatory administration group and a representative of the Adviser. The Valuation Committee operates pursuant to the Trust’s Valuation and Error Correction Policy (the “Valuation Policy”), as approved by the Board. The Valuation Committee reports to the Board on the pricing of the Fund’s shares and the valuation of the Fund’s portfolio securities; recommends, subject to approval by the Board, independent pricing services to provide a value for Fund assets; makes and monitors fair value determinations pursuant to the Valuation Policy; and carries out any other functions delegated to it by the Board relating to the valuation of Fund assets.

The Board also regularly receives reports from the Adviser with respect to the investments and securities trading of the Fund. For example, typically, the Board receives reports, presentations and other information from the Adviser on at least an annual basis in connection with the Board’s consideration of the renewal of the investment advisory agreement between the Adviser and the Trust on behalf of the Fund (the “Advisory Agreement”). Also, if applicable, the Board receives reports from the Adviser and other service providers in connection with the Board’s consideration of the renewal of any distribution plan of the Fund under Rule 12b-1 under the 1940 Act. Senior officers of the Trust and senior officers of the Adviser also report regularly to the Audit Committee on valuation matters, internal controls and accounting and financial reporting policies and practices. In addition, the Audit Committee receives regular reports from the Trust’s independent auditors on internal control and financial reporting matters.

Trustee Ownership in the Fund and the Fund Complex. The following table sets forth each Trustee’s ownership of the Fund and the Fund Complex.

Trustees	Dollar Range of Beneficial Ownership in the Fund as of December 31, 2019	Aggregate Dollar Range of Ownership as of December 31, 2019 in all Registered Investment Companies Overseen by Trustee in the Fund Complex
Independent Trustees		
David Tucker	None	None
Mark D. Moyer	None	None
Jennifer Brown-Strabley	None	None

Interested Trustee		
Jessica Chase	None	None

B. Principal Officers of the Trust

The officers of the Trust conduct and supervise its daily business. As of the date of this SAI, the officers of the Trust, their years of birth and their principal occupations during the past five calendar years are as set forth below. Each officer serves until his or her death, resignation or removal and replacement. The business address of each officer is c/o Apex Fund Services, Three Canal Plaza, Suite 600, Portland, Maine 04101.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past 5 Years
Jessica Chase Born: 1970	President; Principal Executive Officer	Since 2015	Director, Apex Fund Services since 2019. Senior Vice President, Atlantic Fund Services 2008-2019.
Karen Shaw Born: 1972	Treasurer; Principal Financial Officer	Since 2008	Senior Vice President, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019.
Zachary Tackett Born: 1988	Vice President; Secretary and Anti-Money Laundering Compliance Officer	Since 2014	Senior Counsel, Apex Fund Services since 2019; Counsel, Atlantic Fund Services 2014-2019.
Michael J. McKeen Born: 1971	Vice President	Since 2009	Senior Vice President, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019.
Timothy Bowden Born: 1969	Vice President	Since 2009	Manager, Apex Fund Services since 2019; Manager, Atlantic Fund Services 2008-2019.
Geoffrey Ney Born: 1975	Vice President	Since 2013	Manager, Apex Fund Services since 2019; Manager, Atlantic Fund Services 2013-2019.
Todd Proulx Born: 1978	Vice President	Since 2013	Manager, Apex Fund Services since 2019; Manager, Atlantic Fund Services 2013-2019.
Carlyn Edgar Born: 1963	Vice President	Since 2008	Senior Vice President, Apex Fund Services since 2019; Senior Vice President, Atlantic Fund Services 2008-2019; Chief Compliance Officer, 2008-2016.
Dennis Mason Born: 1967	Chief Compliance Officer	Since 2016	Fund Compliance Officer, Apex Fund Services since 2019; Fund Compliance Officer, Atlantic Fund Services 2013-2019.

C. Ownership of Securities of the Adviser and Related Companies

As of December 31, 2019, no Independent Trustee (or any of his or her immediate family members) owned beneficially or of record, securities of any Trust investment adviser, the Trust's principal underwriter, or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with any Trust investment adviser or principal underwriter.

D. Information Concerning Trust Committees

Audit Committee. The Trust's Audit Committee, which typically meets quarterly, consists of Messrs. Tucker and Moyer and Ms. Brown-Strabley, constituting all of the Independent Trustees. Pursuant to a charter adopted by the Board, the Audit Committee assists the Board in fulfilling its responsibility for oversight of the quality and integrity of the accounting, auditing and financial reporting practices of the Trust. It is directly responsible for the appointment, termination, compensation and oversight of work of the independent auditors to the Trust. In so doing, the Audit Committee reviews the methods, scope and results of the audits and audit fees charged, and reviews the Trust's internal accounting procedures and controls. During the fiscal year ended June 30, 2020, the Audit Committee met four times.

Nominating Committee. The Trust's Nominating Committee, which meets when necessary, consists of Messrs. Tucker and Moyer and Ms. Brown-Strabley, constituting all of the Independent Trustees. Pursuant to a charter adopted by the Board, the Nominating Committee is charged with the duty of nominating all Trustees and committee members and presenting these nominations to the Board. The Nominating Committee will not consider any nominees for Trustee recommended by security holders. During the fiscal year ended June 30, 2020, the Nominating Committee met one time.

Qualified Legal Compliance Committee. The Qualified Legal Compliance Committee (the "QLCC"), which meets when necessary, consists of Messrs. Tucker and Moyer and Ms. Brown-Strabley, constituting all of the Independent Trustees. The QLCC evaluates and recommends resolutions to reports from attorneys servicing the Trust regarding evidence of material violations of applicable federal and state law or the breach of fiduciary duties under applicable federal and state law by the Trust or an employee or agent of the Trust. During the fiscal year ended June 30, 2020, the QLCC did not meet.

E. Compensation of Trustees and Officers

Each Trustee is paid an annual fee of \$31,000 for service to the Trust. The Chairman of the Board is paid an annual fee of \$41,000. The Chairman of the Audit Committee is paid an additional fee of \$2,000 annually. The Trustees and Chairman may receive additional fees for special Board meetings. Each Trustee is also reimbursed for all reasonable out-of-pocket expenses incurred in connection with his or her duties as a Trustee, including travel and related expenses incurred in attending Board meetings. No officer of the Trust is compensated by the Trust, but officers are reimbursed for travel and related expenses incurred in attending Board meetings held outside of Portland, Maine.

The following table sets forth the fees paid to each Trustee by the Fund and the Fund Complex for the fiscal year ended June 30, 2020.

Trustee	Aggregate Compensation from the Fund	Pension or Retirement Benefits Accrued as part of Fund Expenses	Total Compensation from Fund Complex
Independent Trustees			
David Tucker	\$3,542	N/A	\$3,542
Mark D. Moyer	\$2,851	N/A	\$2,851
Jennifer Brown-Strabley	\$2,678	N/A	\$2,678
Interested Trustee			
Jessica Chase	\$0	N/A	\$0

F. Investment Adviser

Services of Adviser. The Adviser serves as investment adviser to the Fund pursuant to the Advisory Agreement. Under the Advisory Agreement, the Adviser furnishes, at its own expense, all services, facilities, and personnel necessary in connection with managing the Fund's investments and effecting portfolio transactions for the Fund. The Adviser may compensate brokers or other service providers ("Financial Intermediaries") out of its own assets, and not as additional charges to the Fund, in connection with the sale and distribution of shares of the Fund and/or servicing of these shares.

Ownership of Adviser. The Fund's investment adviser is Auxier Asset Management LLC, 15668 NE Eilers Road, Aurora, Oregon 97002. J. Jeffrey Auxier may be deemed to be a controlling person of the Adviser due to his control of JA Holdings, Inc. JA Holdings, Inc. was created to be the sole member of the Adviser.

Information Concerning Accounts Managed by Portfolio Manager. The following table provides information regarding other accounts managed by the portfolio manager as of June 30, 2020:

Name of Portfolio Manager	Number of Other Accounts Managed and Assets by Account Type			Number of Accounts and Assets for Which Advisory Fee is Performance-Based		
	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts
J. Jeffrey Auxier	None	None	450 accounts \$391 million	None	None	4 accounts \$7 million

Conflicts of Interest. Actual or apparent conflicts of interest may arise when the portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with the following conflicts:

- The management of multiple client accounts may result in the portfolio manager devoting unequal time and attention to the management of the Fund. The Adviser may seek to manage such competing interests for the time and attention of the portfolio manager by having the portfolio manager focus on a particular investment discipline.
- If the portfolio manager identifies a limited investment opportunity which may be suitable for more than one account, the Fund may be unable to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible accounts. To deal with these situations, the Adviser has adopted procedures for allocating portfolio transactions across multiple accounts.
- With respect to securities transactions for the Fund, the Adviser determines which broker to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as other pooled investment vehicles that are not registered mutual funds and other accounts managed for organizations and individuals), the Adviser may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, the Adviser may place separate, non-simultaneous transactions for the Fund and another account which may temporarily affect the market price of the security or the execution of the transaction, or both, to the detriment of the Fund or the other account.
- Finally, the appearance of a conflict of interest may arise if the Adviser has an incentive, such as a performance-based management fee, which relates to the management of one fund or account but not all funds and accounts with respect to which a portfolio manager has day-to-day management responsibilities.

The Adviser has adopted certain compliance procedures, which are designed to address these types of conflicts. The Adviser has developed and implemented policies and procedures designed to ensure that all clients are treated equitably. In addition, compliance oversight and monitoring ensures adherence to policies designed to avoid conflicts. The Adviser's policies and procedures address trade aggregation and allocation. Additionally, given the nature of the Adviser's investment process and its Fund and/or other accounts, the Adviser's investment management team services are typically applied collectively to the management of all the Funds and/or other accounts following the same strategy.

Compensation of the Adviser's portfolio manager is not based upon performance of the Fund managed by the Adviser. Fund performance is not a factor in compensation as it might encourage investment decisions deviating from the Fund's mandate. To mitigate the potential for conflict to have a team member favor one Fund over another Fund and/or other account, the Adviser has established procedures, including policies to monitor trading and best execution for all funds and/or other accounts.

There is no guarantee that such procedures will detect each and every situation in which a conflict arises.

Information Concerning Compensation of Portfolio Manager. Mr. Auxier receives a fixed base cash salary from the Adviser, which is not based on the investment performance or assets of the Fund or other advisory accounts.

Portfolio Manager Ownership in the Fund. The Adviser has provided the following information regarding the portfolio manager’s ownership in the Fund:

Portfolio Manager	Dollar Range of Beneficial Ownership in the Fund as of June 30, 2020
J. Jeffrey Auxier	Over \$1,000,000

Fees. The Adviser receives an advisory fee from the Fund at an annual rate equal to 0.80% of the Fund’s average annual daily net assets under the terms of the Advisory Agreement. The Adviser has contractually agreed to waive its fee and/or reimburse Fund expenses to limit the Fund’s Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding all taxes, interest, portfolio transaction expenses, dividend expenses on short sales, and extraordinary expenses) to 0.92% of Investor Shares, 1.25% of A Shares and 0.80% of Institutional Shares through at least October 31, 2021 (“Expense Cap”). The Expense Cap may only be raised or eliminated with the consent of the Board of Trustees. The Adviser may recoup from the Fund fees waived and expenses reimbursed by the Adviser pursuant to the Expense Cap if such recoupment is made within three years of the fee waiver or expense reimbursement and does not cause the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement of a class (after the recoupment has been taken into account) to exceed the lesser of (i) the then-current expense cap and (ii) the expense cap in place at the time the fees/expenses were waived or reimbursed. Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement will increase if exclusions from the Expense Cap apply.

The advisory fee, if not waived, is accrued daily and paid monthly by the Fund and is assessed based on the daily net assets of the Fund. If you have a separately managed account with the Adviser with assets invested in the Fund, the Adviser will not assess or receive any management fee on the portion of the separately managed account invested in the Fund.

Table 1 in Appendix B shows the dollar amount of advisory fees accrued by the Fund, the amount of advisory fees waived and/or expenses reimbursed by the Adviser, if any, and the actual advisory fees retained by the Adviser. The data provided is for the last three fiscal years.

Advisory Agreement. The Fund’s Advisory Agreement remains in effect for an initial period of two years from the date of its effectiveness, and thereafter the Advisory Agreement must be approved at least annually by the Board or by majority vote of the shareholders, and in either case by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party (other than as Trustees of the Trust).

The Advisory Agreement is terminable without penalty by the Trust with respect to the Fund on 60 days’ written notice when authorized either by vote of the Fund’s shareholders or by a majority vote of the Board, or by the Adviser on 60 days’ written notice to the Trust. The Advisory Agreement terminates immediately upon assignment.

Under the Advisory Agreement, the Adviser is not liable for any error of judgment, mistake of law, or act or omission, except for willful misfeasance, bad faith, or gross negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Advisory Agreement.

G. Distributor

Distribution Services. Foreside Fund Services, LLC (the “Distributor”) and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor is not affiliated with the Adviser or any other service provider for the Trust.

Under a Distribution Agreement with the Trust, the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Adviser, rather than the Distributor, typically enters into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than

the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to investors by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not the investors, will be the shareholder of record, although investors may have the right to vote shares depending upon their arrangement with the intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 plan is effective, as applicable. The Adviser pays the Distributor a fee for certain distribution-related services.

Pursuant to the Distribution Agreement, the Distributor receives, and may re-allow certain financial institutions, all, or a portion of, the sales charge paid on purchases of the Fund's A Shares. Sales charge and 12b-1 amounts not paid to dealers may be paid to the Adviser for Fund distribution expenses that are permitted under the Fund's Rule 12b-1 plan.

Table 2 in Appendix B shows the dollar amount of aggregate sales charge received by the Distributor, the amount the Distributor set aside to be used solely for distribution-related expenses, and the amount reallocated to financial institutions in connection with purchases of the Fund's A Shares. The data presented is for the last three fiscal years.

Distribution Plan. The Trust, including a majority of Independent Trustees who have no direct or indirect financial interest in the operation of the Rule 12b-1 plan, has adopted a Rule 12b-1 plan under which the Fund is authorized to pay to the Distributor and any other entity authorized by the Board, including the Adviser (collectively, "payees"), a fee equal to 0.25% of the average daily net assets of the Fund's A Shares for distribution services and/or the servicing of shareholder accounts. The payees may pay any or all amounts received under the Rule 12b-1 plan to other persons for any distribution or service activity conducted on behalf of the Fund. The Rule 12b-1 plan is a core component of the ongoing distribution of the Fund's A Shares, which is intended to attract and retain assets from prospective investors and may realize potential economies of scale for shareholders in the form of future lower expense ratios. Pursuant to an agreement between the Distributor and the Adviser, the Distributor may reimburse certain distribution-related and/or shareholder servicing expenses incurred by the Adviser.

The Rule 12b-1 plan provides that the payees may incur expenses for distribution and service activities including, but not limited to (1) any sales, marketing and other activities primarily intended to result in the sale of Fund shares and (2) providing services to holders of shares related to their investment in the Fund, including, without limitation, providing assistance in connection with responding to shareholder inquiries regarding the Fund's investment objective, policies and other operational features and inquiries regarding shareholder accounts. Expenses for such activities include compensation to employees and expenses, including overhead and telephone and other communication expenses, of a payee who engages in or supports the distribution of Fund shares or who provides shareholder servicing, such as responding to shareholder inquiries regarding the Fund's operations; the incremental costs of printing (excluding typesetting) and distributing prospectuses, statements of additional information, annual reports and other periodic reports for use in connection with the offering or sale of Fund shares to any prospective investors; and the costs of preparing, printing and distributing sales literature and advertising materials used by the Distributor, the Adviser or others in connection with the offering of Fund shares for sale to the public.

The Rule 12b-1 plan requires the payees to prepare and submit to the Board, at least quarterly, and the Board to review, written reports setting forth all amounts expended under the Rule 12b-1 plan and identifying the activities for which those expenditures were made. The Rule 12b-1 plan obligates the Fund to compensate payees for services and not to reimburse them for expenses incurred.

The following payments made by the Distributor under the Rule 12b-1 plan were used as set forth below during the fiscal year ended June 30, 2020.

Advertising	Printing & Mailing of Prospectuses	Compensation to Underwriters	Compensation to Broker-Dealers	Compensation to Sales Personnel	Interest, Carrying or Other Financial Charges
\$0	\$0	\$0	\$6,283	\$0	\$0

As of June 30, 2020, the amount of unreimbursed expenses incurred under the Rule 12b-1 plan was \$874 for the Fund, representing less than 0.01% of the Fund's net assets.

The Rule 12b-1 plan provides that it will remain in effect for one year from the date of its adoption and thereafter shall continue in effect provided it is approved at least annually by the shareholders or by the Board, including a majority of the Independent Trustees. The Rule 12b-1 plan further provides that it may not be amended to materially increase the costs that the Fund or class bears for distribution or shareholder servicing pursuant to the Rule 12b-1 plan without approval by affected shareholders and that other material amendments of the Rule 12b-1 plan must be approved by the Independent Trustees. The Rule 12b-1 plan may be terminated with respect to A Shares at any time by the Board, by a majority of the Independent Trustees or by the shareholders of A Shares. No Independent Trustee has any direct or indirect financial interest in the Rule 12b-1 Plan.

Table 3 in Appendix B shows the dollar amount of fees payable by the Fund to the Distributor or its agents under the Rule 12b-1 plan, the amount of fees waived by the Distributor or its agents and the actual fees received by the Distributor and its agents under the Rule 12b-1 plan. The data provided is for the last three fiscal years.

H. Other Fund Service Providers

Administrator, Fund Accountant, Transfer Agent, and Compliance Services. Apex Fund Services and its subsidiaries provide administration, compliance, fund accounting and transfer agency services to the Fund. Apex Fund Services is a wholly owned subsidiary of Apex US Holdings LLC.

Pursuant to a Services Agreement (the "Services Agreement") with Atlantic Fund Administration, LLC (d/b/a Apex Fund Services), the Fund pays Apex Fund Services a bundled fee for administration, compliance, fund accounting and transfer agency services. The Fund also pays Apex Fund Services certain surcharges and shareholder account fees. The fee is accrued daily by the Fund and is paid monthly based on the average net assets, transactions and positions for the prior month.

The Services Agreement continues in effect until terminated, so long as its continuance is specifically approved or ratified with such frequency and in such manner as required by applicable law. After an initial three-year term, the Services Agreement is terminable with or without cause and without penalty by the Trust or by Apex Fund Services on 120 days' written notice to the other party. The Services Agreement is also terminable for cause by the non-breaching party on at least 60 days' written notice to the other party, provided that such party has not cured the breach within that notice period. Under the Services Agreement, Apex Fund Services is not liable to the Fund or the Fund's shareholders for any act or omission, except for willful misfeasance, bad faith or negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Services Agreement. The Services Agreement also provides that Apex Fund Services will not be liable to a shareholder for any loss incurred due to a NAV difference if such difference is less than or equal to 0.5% or less than or equal to \$25.00 per shareholder account, and in addition, limits the amount of any loss for which Apex Fund Services would be liable. Also, Apex Fund Services is not liable for the errors and omissions of others, including the entities that supply security prices to Apex Fund Services and the Fund. Losses incurred by the Fund as a result of acts or omissions by Apex Fund Services or any other service provider for which Apex Fund Services or the service provider is not liable to the Fund would be borne through the Fund, by its shareholders.

As Administrator, Apex Fund Services administers the Fund's operations except those that are the responsibility of any other service provider hired by the Trust, all in such manner and to such extent as may be authorized by the Board. The Administrator's responsibilities include, but are not limited to: (1) overseeing the performance of administrative and professional services rendered to the Fund by others, including its custodian, transfer agent and dividend disbursing agent as well as legal, auditing, shareholder servicing and other services performed for the Fund; (2) preparing for filing and filing certain regulatory filings (*i.e.*, registration statements and shareholder reports) subject to Trust counsel and/or independent auditor oversight; (3) overseeing the preparation and filing of the Fund's tax returns, the preparation of financial statements and related reports to the Fund's shareholders, the SEC and state and other securities administrators; (4) providing the Fund with adequate general office space and facilities and providing persons suitable to the Board to serve as officers of the Trust;

(5) assisting the Adviser in monitoring Fund holdings for compliance with prospectus investment restrictions and assisting in preparation of periodic compliance reports; and (6) with the cooperation of the Adviser, the officers of the Trust and other relevant parties, preparing and disseminating materials for meetings of the Board.

Apex Fund Services provides a Principal Executive Officer, a Principal Financial Officer, a CCO, and an Anti-Money Laundering Compliance Officer to the Fund, as well as certain additional compliance support functions.

Atlantic Shareholder Services, LLC, 3 Canal Plaza, Portland, Maine 04101 (the “Transfer Agent”), a wholly owned subsidiary of Apex US Holdings LLC (d/b/a Apex Fund Services), serves as transfer agent and distribution paying agent for the Fund. The Transfer Agent is registered as a transfer agent with the SEC. The Transfer Agent maintains an account for each shareholder of record of the Fund and is responsible for processing purchase and redemption requests and paying distributions to shareholders of record.

As Fund accountant, Apex Fund Services provides fund accounting services to the Fund. These services include calculating the NAV of each Fund class.

Table 4 in Appendix B shows the dollar amount of the fees accrued by the Fund for administration services, the amount of fees waived by Apex Fund Services, if any, and the actual fees retained by Apex Fund Services under the Services Agreement. The data provided is for the last three fiscal years.

Custodian. MUFG Union Bank, N.A. (the “Custodian”) is the custodian for the Fund. The Custodian safeguards and controls the Fund’s cash and securities, determines income and collects interest on Fund investments. The Custodian may employ subcustodians to provide custody of the Fund’s domestic and foreign assets. The Custodian also maintains certain books and records of the Fund that are required by applicable federal regulations. The Custodian is located at 350 California Street, 6th Floor, San Francisco, California 94104.

Legal Counsel. K&L Gates LLP, 1601 K Street, N.W., Washington, D.C. 20006, serves as legal counsel to the Trust.

Independent Registered Public Accounting Firm. BBD, LLP (“BBD”), 1835 Market Street, 3rd Floor, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Fund, providing audit and tax services. BBD audits the annual financial statements of the Fund and provides the Fund with an audit opinion. BBD also reviews certain regulatory filings of the Fund.

PORTFOLIO TRANSACTIONS

A. How Securities are Purchased and Sold

Purchases and sales of portfolio securities that are fixed-income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from which the Fund purchases or to which the Fund sells is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. There usually are no brokerage commissions paid for these securities.

Purchases and sales of portfolio securities that are equity securities (for instance, common stock and preferred stock) are generally effected if (1) the security is traded on an exchange, through brokers that charge commissions and (2) the security is traded in the over-the-counter markets, in a principal transaction directly from a market maker. In transactions on stock exchanges, commissions are negotiated.

When transactions are executed in an over-the-counter market, the Adviser will seek to deal with the primary market makers, but when necessary in order to obtain best execution, the Adviser will utilize the services of others.

The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflect the spread between the bid and asked price.

In the case of fixed-income and equity securities traded in the over-the-counter markets, there is generally no stated commission, but the price usually includes an undisclosed commission, markup or markdown.

B. Commissions Paid

Table 5 in Appendix B shows the dollar amount of the aggregate brokerage commissions paid by the Fund; the amount of commissions paid to an affiliate of the Fund, the Adviser or the Distributor; the percentage of brokerage commissions paid to an affiliate of the Fund, the Adviser or the Distributor; and the percentage of transactions executed by an affiliate of the Fund, the Adviser or the Distributor. The data provided is for the last three fiscal years.

C. Adviser Responsibility for Purchases and Sales and Choosing Broker-Dealers

The Adviser places orders for the purchase and sale of securities with broker-dealers selected by and at the discretion of the Adviser. The Fund does not have any obligation to deal with a specific broker or dealer in the execution of portfolio transactions. Allocations of transactions to brokers and dealers and the frequency of transactions are determined by the Adviser in its best judgment and in a manner deemed to be in the best interest of the Fund rather than by any formula.

The Adviser seeks “best execution” for all portfolio transactions. This means that the Adviser seeks the most favorable price and execution available. The Fund may not always pay the lowest commission or spread available. Rather, in determining the amount of commissions (including certain dealer spreads) paid in connection with securities transactions, the Adviser takes into account factors such as the size of the order, the difficulty of execution, the efficiency of the executing broker’s facilities (including the research services described below) and any risk assumed by the executing broker-dealer. The Fund may pay a higher commission if, for example, the broker-dealer has specific expertise in a particular type of transaction (due to factors such as size or difficulty) or is highly efficient in trade execution.

The Adviser may also give consideration to brokerage and research services furnished to the Adviser by broker-dealers and may cause the Fund to pay these broker-dealers a higher commission or spread than may be charged by other broker-dealers. Research services may include reports that are common in the industry, such as research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the Adviser uses the research to manage all client accounts. Therefore, the commission dollars spent for research generally benefit all of the Adviser’s clients and the Fund’s investors, although a particular client may not benefit from research received on each occasion. The Adviser does not reduce its fees because the Adviser receives research.

Table 6 in Appendix B lists the Fund’s directed brokerage in return for research services, the amount of transactions so directed, and the amount of commissions earned by the broker-dealer during the past fiscal year.

D. Counterparty Risk

The Adviser monitors the creditworthiness of counterparties to the Fund's transactions and intends to enter into a transaction only when it believes that the counterparty presents appropriate credit risks.

E. Transactions through Affiliates

The Adviser may effect brokerage transactions through affiliates of the Adviser (or affiliates of those persons) pursuant to procedures adopted by the Trust and in accordance with applicable law.

F. Other Accounts of the Adviser

Investment decisions for the Fund are made independently from those for any other account or investment company that is or may in the future become advised by the Adviser or its affiliates. Investment decisions are the product of many factors, including basic suitability for the particular client involved. Likewise, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. In some instances, with any required consent, one client may sell a particular security to another client. In addition, two or more clients may simultaneously purchase or sell the same security through the same executing broker-dealer, in which event each day's transactions in such security are, insofar as is possible, averaged as to price and allocated between such clients in a manner which, in the Adviser's opinion, is in the best interest of the affected accounts and is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of a portfolio security for one client could have an adverse effect on another client that has a position in that security. In addition, when purchases or sales of the same security for the Fund and other client accounts managed by the Adviser occur contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large denomination purchases or sales. Purchase or sale orders for access persons of the Adviser and their affiliated persons may also be aggregated with client orders.

G. Portfolio Turnover

The frequency of portfolio transactions of the Fund (the portfolio turnover rate) will vary from year to year depending on many factors. From time to time, the Fund may engage in active short-term trading to take advantage of price movements affecting individual issues, groups of issues or markets. Higher portfolio turnover rates may result in increased brokerage costs to the Fund and a possible increase in short-term capital gains (taxable to shareholders as ordinary income when distributed to them) or losses. An annual portfolio turnover rate of 100% would occur if all the securities in the Fund were replaced once in a period of one year.

Portfolio turnover rate is defined under the rules of the SEC as the value of the securities purchased or securities sold, excluding all securities whose maturities at time of acquisition were one year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one year, including options in which the Fund invests, are excluded from the calculation of portfolio turnover rate.

H. Securities of Regular Broker-Dealers

From time to time the Fund may acquire and hold securities issued by its "regular brokers and dealers" or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the ten brokers or dealers that: (1) received the greatest amount of brokerage commissions during the Fund's last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of the Fund during the Fund's last fiscal year; or (3) sold the largest amount of the Fund's shares during the Fund's last fiscal year.

Table 7 in Appendix B lists the regular brokers and dealers of the Fund whose securities (or the securities of the parent company) were acquired during the past fiscal year and the aggregate value of the Fund's holdings of those securities as of the Fund's most recent fiscal year ended June 30, 2020.

I. Portfolio Holdings

Portfolio holdings as of the end of the Fund's annual and semi-annual fiscal periods are reported to the SEC on Form N-CSR within 10 days of the mailing of the annual or semi-annual report (typically no later than 70 days after the end of each period). Monthly portfolio disclosures will be filed with the SEC on Form N-PORT no later than 60 days after the end of each fiscal quarter. The monthly holdings reports on Form N-PORT for the first and second months of the fiscal quarter will

remain non-public and the monthly holdings report for the third month of the fiscal quarter will become publicly available upon filing (with the exception of certain items). You may request a copy of the Fund's latest annual or semi-annual report to shareholders or a copy of the Fund's latest Form N-PORT, when it is available, which contains the Fund's portfolio holdings, by contacting the Transfer Agent at the address or phone number listed on the cover of this SAI. You may also obtain a copy of the Fund's latest Form N-CSR and Form N-PORT by accessing the SEC's website at www.sec.gov.

In addition, the Adviser may make publicly available, on a monthly basis, information regarding the Fund's top equity holdings (including name and percentage of the Fund's assets invested in each such holding). This holdings information may also be made available through the Adviser's website and may be released within 15 days of the month end.

The Fund's nonpublic portfolio holdings information is received by certain service providers in advance of public release in the course of performing or enabling them to perform the contractual or fiduciary duties necessary for the Fund's operations that the Fund has retained them to perform so long as the disclosure is subject to duties of confidentiality imposed by law and/ or contract as determined by the Fund's officers and, if applicable, the Board. The Fund's portfolio holdings are available in real-time on a daily basis to the Adviser, the Administrator and the Custodian. In addition, the Distributor, the independent auditors, proxy voting services, mailing services, and financial printers and ratings or ranking organizations may have access, but not on a daily real-time basis, to the Fund's nonpublic portfolio holdings information on an ongoing basis. The Trustees, Trust's officers, legal counsel to the Trust and to the Independent Trustees, and the Fund's independent registered public accounting firm may receive such information on an as needed basis.

From time to time, nonpublic information regarding the Fund's portfolio holdings may also be disclosed to certain mutual fund consultants, analysts, or other entities or persons ("Recipients") that have a legitimate business purpose in receiving such information. Any disclosure of information more current than the latest publicly available portfolio holdings information will be made only if a Trust officer determines that: (1) the more current information is necessary for a Recipient to complete a specified task; (2) the Fund has legitimate business purposes for disclosing the information; and (3) the disclosure is in the best interests of the Fund and its shareholders. Any Recipient receiving such information shall agree in writing to: (1) keep the information confidential; (2) use it only for agreed-upon purposes; and (3) not trade or advise others to trade securities, including shares of the Fund, on the basis of the information. Such confidentiality agreements entered into for the receipt of nonpublic information shall also provide, among other things, that the Recipient: (1) will limit access to the information to its employees and agents who are obligated to keep and treat such information as confidential; (2) will assume responsibility for any breach of the terms of the confidentiality agreement by its employees; and (3) upon request from the Trust, will return or promptly destroy the information. Any Recipient that is a ratings or ranking organization receiving such information must have in place control mechanisms to reasonably ensure or otherwise agree that: (1) the holdings information will be kept confidential; (2) no employee shall use the information to effect trading or for their personal benefit; and (3) the nature and type of information that any employee, in turn, may disclose to third-parties is limited. The Trust officer shall report to the Board at its next regularly scheduled Board meeting the entering into of an agreement with a Recipient for the disclosure of nonpublic portfolio holdings information and shall include in the report the Trust officer's reasons for determining to permit such disclosure.

The Adviser may provide investment management for accounts of clients other than the Fund, which may result in some of those accounts having a composition substantially similar to that of the Fund. The Adviser and its affiliates may provide regular information to clients and others regarding the holdings in accounts that each manages, but no information is provided to clients or others that identifies the actual composition of the Fund's holdings, specifies the amount of the Fund's assets invested in a security or specifies the extent of any such similarities among accounts managed by the Adviser.

No compensation is received by the Fund, or, to the Fund's knowledge, paid to the Adviser or any other party in connection with the disclosure of the Fund's portfolio holdings. The codes of ethics of the Trust and the Adviser are intended to address, among other things, potential conflicts of interest arising from the misuse of information concerning the Fund's portfolio holdings. In addition, the Fund's service providers may be subject to confidentiality provisions contained within their service agreements, codes of ethics, professional codes, or other similar policies that address conflicts of interest arising from the misuse of such information.

The Adviser, Administrator and Distributor must inform a Trust officer if it identifies any conflict between the interests of shareholders and those of another party resulting from the disclosure of nonpublic portfolio holdings information. Such conflicts will be reported to the Board for appropriate action at its next regularly scheduled meeting.

There is no assurance that the Fund's portfolio holdings disclosure policy will protect the Fund against potential misuse of holdings information by individuals or firms in possession of that information.

PURCHASE AND REDEMPTION INFORMATION

A. General Information

You may effect purchases or redemptions or request any shareholder privilege by contacting the Transfer Agent.

The Fund accepts orders for the purchase or redemption of shares of the Fund on any weekday except days when the New York Stock Exchange (the “NYSE”) is closed. Under unusual circumstances, the Fund may accept orders when the NYSE is closed if deemed appropriate by the Trust’s officers.

The shares of the Fund may not be available for sale in the state in which you reside. Please check with your investment professional to determine the Fund’s availability.

B. Additional Purchase Information

Shares of each class of the Fund are offered on a continuous basis by the Distributor.

The Fund reserves the right to refuse any purchase request.

Fund shares are normally issued for cash only. In its discretion, the Fund may accept portfolio securities that meet the investment objective and policies of the Fund as payment for Fund shares. The Fund may allow an in kind purchase provided that, among other things: (i) the purchase will not dilute the interests of its shareholders; (ii) the assets accepted by the Fund consist of securities that are appropriate, in type and amount, for investment by the Fund in light of its investment objective and policies and current holdings; (iii) market quotations are readily available for the securities; (iv) in determining the value of the assets contributed and the corresponding amount of shares issued, the Trust’s Valuation Policy will be applied; (v) the transaction must comply with the Trust’s Affiliated Persons and Transactions Policy if the person investing is an affiliated person; and (vi) the Adviser to the Fund discloses to the Board the existence of, and all material facts relating to, any conflicts of interest between the Adviser and the Fund in the proposed in-kind purchase.

IRAs. All contributions into an individual retirement account (an “IRA”) through the automatic investing service are treated as IRA contributions made during the year that the contribution is received.

UGMAs/UTMAs. If the custodian’s name is not in the account registration of a gift or transfer to minor (“UGMA/UTMA”) account, the custodian must provide instructions in a manner indicating custodial capacity.

C. Additional Redemption Information

You may redeem Fund shares at NAV.

The Fund may reverse a transaction for the purchase of Fund shares within two business days of notification from your bank that your funds did not clear (1) to collect any charge relating to transactions effected for the benefit of a shareholder that is applicable to the Fund’s shares as provided in the Prospectus or (2) to recoup any actual losses incurred by the Fund or the Transfer Agent in connection with any reversed transaction.

Sales Charges. Certain persons may also be eligible to purchase or redeem A Shares without a sales charge, as set forth in the Prospectus, including any Trustees and officer of the Trust, directors, officers and full-time employees of the Adviser, any trust or individual retirement account or self-employed retirement plan for the benefit of any such person or relative; or the estate of any such person or relative. The elimination of the sales charge with respect to these investors is due to the reduced efforts necessary to obtain these investments.

Suspension of Right of Redemption. The right of redemption may not be suspended for more than seven days after the tender of Fund shares, except for any period during which: (1) the NYSE is closed (other than customary weekend and holiday closings) or during which the SEC determines that trading thereon is restricted; (2) an emergency (as determined by the SEC) exists as a result of which disposal by the Fund of its securities is not reasonably practicable or as a result of which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (3) the SEC has entered a suspension order for the protection of the shareholders of the Fund.

Redemption in Kind. Redemption proceeds normally are paid in cash. The Trust has filed an election with the SEC, however, pursuant to which the Fund may effect a redemption in portfolio securities at the shareholder’s request or if the shareholder is redeeming more than \$250,000 or 1% of the Fund’s total net assets, whichever is less, during any 90-day

period. To the extent the Fund satisfies a redemption request by distributing portfolio securities, it will do so pursuant to procedures adopted by the Board. If the Fund pays redemption proceeds in-kind, the redeeming shareholder may incur transaction costs to dispose of the securities, and may receive less for them than the price at which they were valued for purposes of redemption. In addition, if the Fund redeems shares in this manner, the shareholder assumes the risk of a subsequent change in the market value of those securities, the costs of liquidating the securities (such as brokerage costs) and the possibility of a lack of a liquid market for those securities. In-kind redemptions may take the form of a pro rata portion of the Fund's portfolio, individual securities, or a representative basket of securities.

NAV Determination. The offering price for Fund shares is at their current NAV. In determining the NAV of the Fund, securities for which market quotations are readily available are valued at current market value using the last reported sales price or the official closing price from the primary exchange where the security is listed, as provided by an independent pricing service or, if no sales price is reported, the mean of the last bid and ask prices. If market quotations are not readily available or the Fund reasonably believes that they are unreliable, then securities are valued at fair value as determined by the Board (or its delegate). For further information, see the “General Information” section in the Prospectus.

Distributions. Distributions of net investment income will be reinvested at the NAV of the applicable class (unless you elect to receive distributions in cash) as of the last day of the period with respect to which the distribution is paid. Distributions of net realized capital gains will be reinvested at the NAV of the applicable class (unless you elect to receive distributions in cash) on the payment date for the distribution. Cash payments may be made more than seven days following the date on which distributions would otherwise be reinvested.

TAXATION

The tax information set forth in the Prospectus and in this section relates solely to federal tax law and assumes that the Fund qualifies for treatment as a RIC (as discussed below). This information is only a summary of certain key federal income tax considerations affecting the Fund and its shareholders and is in addition to the tax information provided in the Prospectus. No attempt has been made to present a complete explanation of the federal tax treatment of the Fund or the tax implications to shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning.

This “Taxation” section is based on the IRC, the regulations thereunder, and IRS interpretations and similar authority on which the Fund may rely, all as in effect on the date hereof, as well as on court decisions publicly available through that date. Future legislative, regulatory, or administrative changes or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

Each investor should consult his or her own tax advisor as to the federal, state, local, and foreign tax provisions applicable to the investor.

A. Qualification for Treatment as a Regulated Investment Company

The Fund intends, for each taxable year, to continue to qualify for treatment as a RIC. This qualification does not involve governmental supervision of management or investment practices or policies of the Fund. Each Fund is treated as a separate corporation for federal income tax purposes.

The taxable year-end of the Fund is June 30, which is the same as its fiscal year-end.

Consequences of Qualification. As a RIC, the Fund will not be subject to federal income tax on the portion of its investment company taxable income (generally, interest, dividends, other ordinary income, the excess of net short-term capital gain over net long-term capital loss, and net gains and losses from certain foreign currency transactions, net of expenses, all determined without regard to any deduction for dividends paid) and net capital gain (that is, the excess of net long-term capital gain over net short-term capital loss) that it distributes to its shareholders. To qualify to be taxed as a RIC for a taxable year, the Fund must satisfy the following requirements, among others:

- The Fund must distribute at least the sum of 90% of its investment company taxable income plus 90% of its net interest income excludable from gross income under IRC Section 103(a) for the taxable year (“Distribution Requirement”). Certain distributions made by the Fund after the close of its taxable year are considered distributions attributable to that taxable year for purposes of satisfying this requirement.
- The Fund must derive at least 90% of its gross income for the taxable year from (1) dividends, interest, payments with respect to securities loans, and gains from the sale or other disposition of securities or foreign currencies, or other income (including gains from options) derived from its business of investing in securities or those currencies and (2) net income from an interest in a “qualified publicly traded partnership” (“QPTP”) (income described in (1) and (2), collectively “Qualifying Income”) (“Gross Income Requirement”). A QPTP is defined as a “publicly traded partnership” (generally, a partnership the interests in which are “traded on an established securities market” or are “readily tradable on a secondary market (or the substantial equivalent thereof)”) that derives less than 90% of its gross income from sources described in clause (1).
- The Fund must satisfy the following asset diversification requirements (“Diversification Requirements”) at the close of each quarter of its taxable year: (1) at least 50% of the value of its total assets must consist of cash and cash items, Government securities, securities of other RICs, and securities of other issuers, with these other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of the Fund’s total assets and that does not represent more than 10% of the issuer’s outstanding voting securities (equity securities of a QPTP being considered voting securities for these purposes); and (2) no more than 25% of the value of its total assets may be invested in (a) the securities of any one issuer (other than Government securities and securities of other RICs), (b) the securities (other than securities of other RICs) of two or more issuers that the Fund controls (by owning 20% or more of their voting power) and that are engaged in the same, similar, or related trades or businesses, or (c) the securities of one or more QPTPs.

Failure to Qualify. If for any taxable year the Fund does not qualify for treatment as a RIC, either (1) by failing to satisfy the Distribution Requirement, even if it satisfied the Gross Income Requirement and the Diversification Requirements, or (2) by

failing to satisfy the Gross Income Requirement and/or either Diversification Requirement and being unable, or determining not, to cure the failure in the manner described in the next two paragraphs, then for federal income tax purposes all of its taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for dividends paid to its shareholders. In addition, for those purposes the dividends would be taxable to the shareholders as ordinary income to the extent of the Fund's current and accumulated earnings and profits, except that, for (a) individual and certain other non-corporate shareholders (each, an "individual shareholder"), the part thereof that is "qualified dividend income" would be subject to federal income tax at the rates for net capital gain, which are a maximum of 15% for a non-corporate shareholder with taxable income not exceeding certain thresholds (which will be adjusted for inflation annually) and 20% for non-corporate shareholders with taxable income exceeding such thresholds, and (b) those dividends would be eligible for the dividends-received deduction available to corporations under certain circumstances. Furthermore, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying for RIC treatment.

If the Fund fails to satisfy the Gross Income Requirement for any taxable year, it nevertheless will be considered to have satisfied that requirement for that year if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund pays a tax in an amount equal to the excess of its gross income that is not Qualifying Income over one-ninth of its gross income that is Qualifying Income.

If the Fund satisfies both Diversification Requirements at the close of its first quarter of its first taxable year, but fails to satisfy either Diversification Requirement at the close of any subsequent taxable year quarter by reason of a discrepancy existing immediately after its acquisition of any security that is wholly or partly the result of that acquisition during that quarter, it will not lose its status for that quarter as a RIC if the discrepancy is eliminated within 30 days after the quarter's close. If the Fund fails to satisfy either or both Diversification Requirement(s) (other than a *de minimis* failure, as described in the IRC) for a quarter and the preceding sentence does not apply, it nevertheless will be considered to have satisfied those requirements for that quarter if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund disposes of the assets that caused the failure within six months after the last day of the quarter in which it identifies the failure in the manner prescribed by the IRS. In that case, the Fund will also be liable for a federal tax equal to the greater of \$50,000 or the amount determined by multiplying the net income generated by those assets for the period from the date the failure occurs to the date of disposition thereof by the highest rate of federal income tax applicable to corporations (currently 21%).

Failure to qualify for treatment as a RIC would thus have a negative impact on the Fund's after-tax performance. It is possible that the Fund will not qualify as a RIC in any given taxable year.

B. Fund Distributions

The Fund anticipates distributing substantially all of its investment company taxable income for each taxable year. These distributions will be taxable to a shareholder as ordinary income, but, as described in the Prospectus, a portion of the distributions may be treated as "qualified dividend income".

The Fund anticipates distributing substantially all of its net capital gain (after reduction for any capital loss carryovers, *i.e.*, unutilized realized net capital losses from prior taxable years) for each taxable year. These distributions generally will be made only once a year, usually in December, but the Fund may make a limited number of additional distributions of net capital gain at any time during the year. These distributions will be taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held his or her shares. These distributions will not qualify for the dividends-received deduction or as "qualified dividend income."

A distribution by the Fund that does not constitute an ordinary income dividend or capital or foreign currency gain distribution will be treated as a non-taxable "return of capital." A return of capital distribution will reduce a shareholder's tax basis in Fund shares and will be treated as gain from the sale of the shares to the extent it exceeds the shareholder's basis.

Non-U.S. investors not engaged in a U.S. trade or business with which their investment in the Fund is "effectively connected" will be subject to U.S. federal income tax treatment that is different from that described above. Such non-U.S. investors may be subject to withholding tax at the rate of 30% (or a lower rate under an applicable tax treaty) on amounts treated as ordinary dividends from the Fund. Capital gain distributions, if any, are not subject to the 30% withholding tax. Exemption from this withholding tax is also provided for dividends properly reported in writing by the Fund to its shareholders as "interest-related dividends" or as "short-term capital gain dividends" paid by the Fund with respect to its "qualified net interest income" or "qualified short-term gain," respectively (all such terms as defined in the IRC). Non-U.S. investors will need to provide an effective IRS Form W-8BEN or other authorized withholding certificate to qualify for the exemption.

Each distribution by the Fund will be treated in the manner described above regardless of whether the distribution is paid in cash or reinvested in additional shares of the Fund (or of another fund). If a shareholder reinvests a distribution in additional shares, the shareholder will be treated as having received a distribution in an amount equal to the fair market value of the reinvested shares, determined as of the reinvestment date.

When a shareholder purchases shares of the Fund, the purchase price (NAV) will include any undistributed net investment income and realized net capital gains and foreign currency gains and any unrealized appreciation in the value of the assets of the Fund. A distribution of that income or gain (including net gain, if any, from realizing all or part of that appreciation) will be taxable to a shareholder in the manner described above, even if the distribution economically constitutes a partial return of invested capital to the shareholder.

Ordinarily, a shareholder is required to take taxable distributions by the Fund into income in the year in which they are made. A distribution declared in October, November, or December of any year and payable to shareholders of record on a specified date in one of those months, however, is deemed to be paid by the Fund and received by those shareholders on December 31 of that year if the distribution is paid in January of the following year.

The Fund will send information annually to its shareholders regarding the federal income tax status of distributions made (or deemed made) during the year.

C. Foreign Account Tax Compliance Act (“FATCA”)

Under FATCA, foreign financial institutions (“FFIs”) and non-financial foreign entities (“NFFEs”) that are Fund shareholders may be subject to a generally nonrefundable 30% withholding tax on income dividends the Fund pays. As discussed more fully below, the FATCA withholding tax generally may be avoided (a) by an FFI, if it reports certain information regarding direct and indirect ownership of financial accounts U.S. persons hold with the FFI, and (b) by an NFFE that certifies its status as such and, in certain circumstances, reports information regarding substantial U.S. owners.

An FFI may avoid FATCA withholding by becoming a “participating FFI,” which requires the FFI to enter into a tax compliance agreement with the IRS under the IRC. Under such an agreement, a participating FFI agrees to (1) verify and document whether it has U.S. accountholders, (2) report certain information regarding their accounts to the IRS, and (3) meet certain other specified requirements.

The U.S. Treasury Department has negotiated intergovernmental agreements (each, an “IGA”) with certain countries and is in various stages of negotiations with other foreign countries with respect to one or more alternative approaches to implement FATCA; entities in those countries may be required to comply with the terms of the relevant IGA instead of U.S. Treasury regulations. An FFI resident in a country that has entered into a Model I IGA with the United States must report to that country’s government (pursuant to the terms of the applicable IGA and applicable law), which will, in turn, report to the IRS. An FFI resident in a Model II IGA country generally must comply with U.S. regulatory requirements, with certain exceptions, including the treatment of recalcitrant accountholders. An FFI resident in one of those countries that complies with whichever of the foregoing applies will be exempt from FATCA withholding.

An NFFE that is the beneficial owner of a payment from the Fund may avoid FATCA withholding generally by certifying its status as such and, in certain circumstances, either that (1) it does not have any substantial U.S. owners or (2) it does have one or more such owners and reports the name, address, and taxpayer identification number of each such owner. The NFFE will report to the Fund or other applicable withholding agent, which may, in turn, report information to the IRS.

Those foreign shareholders also may fall into certain exempt, excepted, or deemed compliant categories established by U.S. Treasury regulations, IGAs, and other guidance regarding FATCA. An FFI or NFFE that invests in the Fund will need to provide the Fund with documentation properly certifying the entity’s status under FATCA to avoid FATCA withholding. The requirements imposed by FATCA are different from, and in addition to, the tax certification rules to avoid backup withholding described in the Prospectus. Foreign investors are urged to consult their tax advisors regarding the application of these requirements to their own situations and the impact thereof on their investment in the Fund.

D. Redemption of Shares

In general, you will realize gain or loss on redemption of Fund shares in an amount equal to the difference between the proceeds of the redemption and your adjusted tax basis in the shares. All or a portion of any loss so realized will be disallowed if you purchase Fund shares (for example, by reinvesting distributions) within 30 days before or after the redemption (*i.e.*, a “wash” sale); if disallowed, the loss would be reflected in an upward adjustment to the basis in the purchased shares. In

general, any gain or allowed loss arising from a redemption of shares of the Fund will be considered a capital gain or loss and will be long-term capital gain or loss if the shares were held for longer than one year. Any capital loss arising from a redemption of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain, if any, received on such shares. In determining the holding period of shares for this purpose, any period during which your risk of loss is offset by means of an option, short sale, or similar transaction is not counted. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

E. Federal Excise Tax

A 4% non-deductible federal excise tax (“Excise Tax”) is imposed on a RIC that fails to distribute in each calendar year an amount equal to at least the sum of (1) 98.0% of its ordinary income for the year plus (2) 98.2% of its capital gain net income for the one-year period ended on October 31 of the year plus (3) any ordinary income and capital gain net income for previous years that were not distributed during those years. The Fund will be treated as having distributed any amount on which it is subject to income tax for any taxable year ending in the calendar year.

For purposes of calculating the Excise Tax, the Fund (1) reduces its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year and (2) excludes foreign currency gains and losses realized or sustained after October 31 of any year in determining the amount of ordinary income for that calendar year and includes them in determining the amount of ordinary income for the succeeding calendar year.

The Fund intends to make sufficient distributions each year of its ordinary income and capital gain net income to avoid liability for the Excise Tax. The Fund may in certain circumstances be required to liquidate portfolio investments to make distributions sufficient to avoid that liability.

F. Certain Tax Rules Applicable to Fund Transactions

Investments in Derivatives. When a put or call option purchased by the Fund expires unexercised, the premium it paid gives rise to short-term or long-term capital loss at the time of expiration (depending on the length of the exercise period for the option). When a put or call option written by the Fund expires unexercised, the premium it received gives rise to short-term capital gain at the time of expiration. When the Fund exercises a call option, the basis in the underlying security is increased by the amount of the premium it paid for the option. When the Fund exercises a put option, the gain (or loss) from the sale of the underlying security is decreased (or increased) by the premium it paid for the option. When a put or call option written by the Fund is exercised, the purchase price (or the selling price in the case of a call) of the underlying security is decreased (or increased in the case of a call) for federal income tax purposes by the amount of the premium received.

Some futures contracts, foreign currency contracts, and “nonequity” options (*i.e.*, certain listed options, such as those on a “broad-based” securities index) in which the Fund invests - except any “securities futures contract” that is not a “dealer securities futures contract” (both as defined in the Code) and any interest rate swap, currency swap, basis swap, interest rate cap, interest rate floor, commodity swap, equity swap, equity index swap, credit default swap, or similar agreement - may be subject to IRC section 1256 (“Section 1256 contracts”). Any Section 1256 contracts the Fund holds at the end of its taxable year (and generally for purposes of the Excise Tax, on October 31 of each year) must be “marked to market” (that is, treated as having been sold at that time for their fair market value) for federal tax purposes, with the result that unrealized gains or losses will be treated as though they were realized. Sixty percent of any net gain or loss realized on these deemed sales, and 60% of any net realized gain or loss from any actual sales of Section 1256 contracts, will be treated as long-term capital gain or loss, and the balance will be treated as short-term capital gain or loss; however, certain foreign currency gains or losses arising from Section 1256 contracts will be treated as ordinary income or loss. These rules may operate to increase the amount that the Fund must distribute to satisfy the Distribution Requirement (*i.e.*, with respect to the portion treated as short-term capital gain, which will be includible in its investment company taxable income and thus taxable to its shareholders as ordinary income when distributed to them), and to increase the net capital gain the Fund recognizes, even though the Fund may not have closed the transactions and received cash to pay the distributions. The Fund may elect not to have the foregoing rules apply to any “mixed straddle” (that is, a straddle, which the Fund clearly identifies in accordance with applicable regulations, at least one (but not all) of the positions of which are Section 1256 contracts), although doing so may have the effect of increasing the relative proportion of short-term capital gain (distributions of which are taxable to its shareholders as ordinary income) and thus increasing the amount of dividends it must distribute.

Any option or other position entered into or held by the Fund in conjunction with any other position it holds may constitute a “straddle” for federal income tax purposes. In general, straddles are subject to certain rules that may affect the amount,

character, and timing of recognition of the Fund's gains and losses with respect to the straddle positions by requiring, among other things, that (1) any loss realized on disposition of one position of a straddle not be recognized to the extent that the Fund has unrealized gains with respect to the other positions in the straddle, (2) the Fund's holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term rather than long-term capital gain), (3) the losses recognized with respect to certain straddle positions that are part of a mixed straddle and are non-Section 1256 contracts be treated as 60% long-term and 40% short-term capital loss, and (4) losses recognized with respect to certain straddle positions that would otherwise constitute short-term capital losses be treated as long-term capital losses. In addition, the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to the Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles. In general, the foregoing rules do not apply to any straddles held by the Fund if all of the offsetting positions consist of Section 1256 contracts.

Investments in Foreign Currencies and Securities. Gains or losses attributable to fluctuations in exchange rates that occur between the time that the Fund accrues interest, dividends or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time that the Fund actually collects such receivables or pays such liabilities are treated as ordinary income or ordinary losses. Similarly, gains or losses from the disposition of a foreign currency, or from the disposition of a fixed-income security denominated in a foreign currency that are attributable to fluctuations in the value of the foreign currency between the date of acquisition of the security and the date of its disposition, also are treated as ordinary income or ordinary losses. These gains or losses increase or decrease the amount of the Fund's investment company taxable income available to be distributed to its shareholders as ordinary income, rather than increasing or decreasing the amount of its net capital gain.

If the Fund owns shares in a foreign corporation that constitutes a "passive foreign investment company" for federal tax purposes (a "PFIC") and the Fund does not make either of the elections described in the next two paragraphs, it will be subject to federal income tax on a portion of any "excess distribution" it receives from the PFIC and any gain it derives from the disposition of such shares (collectively, "PFIC Income"), even if it distributes the PFIC Income as a taxable dividend to its shareholders. The Fund will also be subject to additional interest charges in respect of deferred taxes arising from the PFIC Income. Any such tax paid by the Fund as a result of its ownership of shares in a PFIC will not give rise to any deduction or credit to the Fund or to any shareholder. A PFIC is any foreign corporation (with certain exceptions) that, in general, meets either of the following tests for a taxable year: (1) at least 75% of its gross income is derived from "passive income" (including interest and dividends); or (2) an average of at least 50% of the value (or adjusted tax basis, if elected) of its assets produce, or are held for the production of, "passive income." The Fund's distributions of PFIC Income will not be eligible for the 15% and 20% maximum federal income tax rates on individual shareholders' "qualified dividend income" described in the Prospectus.

The Fund may elect to "mark to market" its stock in a PFIC. Under such an election, the Fund would include in gross income (and treat as ordinary income) each taxable year an amount equal to the excess, if any, of the fair market value of the PFIC stock as of the close of the taxable year over the Fund's adjusted basis in the PFIC stock. The Fund would be allowed a deduction for the excess, if any, of that adjusted basis over that fair market value, but only to the extent of any net mark-to-market gains included in gross income by the Fund for prior taxable years. The Fund's adjusted basis in the PFIC stock would be adjusted to reflect the amounts included in, or deducted from, gross income under this election. Amounts so included, as well as gain realized on the disposition of the PFIC stock, would be treated as ordinary income. The deductible portion of any mark-to-market loss, as well as any loss realized on the disposition of the PFIC stock to the extent that such loss does not exceed the net mark-to-market gains previously included in gross income by the Fund, would be treated as ordinary loss. The Fund generally would not be subject to the deferred tax and interest charge provisions discussed above with respect to PFIC stock for which a mark-to-market election has been made.

If the Fund purchases shares in a PFIC and elects to treat the PFIC as a "qualified electing fund," the Fund would be required to include in its gross income each taxable year its *pro rata* share of the ordinary income and net capital gains of the PFIC, even if the income and gains were not distributed to the Fund. Any such income would be subject to the Distribution Requirement and the calendar year Excise Tax distribution requirement described above. In most instances it will be very difficult, if not impossible, to make this election because some of the information required to make this election may not be easily obtainable.

Investors should be aware that determining whether a foreign corporation is a PFIC is a fact-intensive determination that is based on various facts and circumstances and thus is subject to change, and the principles and methodology used therein are subject to interpretation. As a result, (1) the Fund may not be able, at the time it acquires a foreign corporation's shares, to ascertain whether the corporation is a PFIC, and (2) a foreign corporation may become a PFIC after the Fund acquires

shares therein. While the Fund generally will seek not to invest in PFIC shares to avoid the tax consequences detailed above, there are no guarantees that it will be able to do so, and it reserves the right to make such investments as a matter of its investment policy.

G. State and Local Taxes

The tax rules of the various states and their local jurisdictions with respect to an investment in the Fund may differ from the federal income tax rules described above. These state and local rules are not discussed herein. You are urged to consult your tax advisor as to the consequences of state and local tax rules with respect to an investment in the Fund.

H. Foreign Income Tax

Investment income received by the Fund from sources within foreign countries and U.S. possessions and gains that the Fund realizes on the disposition of foreign securities (collectively, “foreign source income”) may be subject to foreign or possession income or other taxes withheld at the source (collectively, “foreign taxes”). The United States has entered into tax treaties with many foreign countries that may entitle the Fund to a reduced rate of foreign taxes imposed by, or exemption from taxes on foreign source income derived from, the particular country. It is impossible to know the effective rate of foreign tax in advance, since the amount of the Fund’s assets to be invested within various countries will vary.

I. Capital Loss Carryovers (“CLCOs”)

The Fund may have capital loss carryovers (“CLCOs”) for a taxable year. CLCOs may be used to offset any current taxable year net realized capital gain (whether short-term or long-term) and will not expire. All CLCOs are listed in the Fund’s financial statements. Any such losses may not be carried back.

OTHER MATTERS

A. The Trust and Its Shareholders

General Information. The Fund is a separate series of the Trust. The Trust is an open-end investment management company organized under Delaware law as a statutory trust on August 29, 1995. On January 5, 1996, the Trust succeeded to the assets and liabilities of Forum Funds, Inc. The Trust's trust instrument (the "Trust Instrument") permits the Trust to offer separate series ("funds") of shares of beneficial interest ("shares"). The Trust reserves the right to create and issue shares of additional funds. The Trust and each fund will continue indefinitely until terminated. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund and all assets of such fund belong solely to that fund and would be subject to liabilities related thereto. The other funds of the Trust are described in one or more separate Statements of Additional Information.

Shareholder Voting and Other Rights. Each share of a fund and each class of shares has equal dividend, distribution, liquidation and voting rights. Fractional shares have those rights proportionately, except that expenses related to the distribution of shares of each fund or class (and certain other expenses such as transfer agency, shareholder service and administration expenses) are borne solely by those shares. Each fund or class votes separately with respect to the provisions of any Rule 12b-1 plan that pertains to the fund or class and other matters for which separate fund or class voting is appropriate under applicable law. Generally, shares will be voted separately by each fund except if: (1) the 1940 Act requires shares to be voted in the aggregate and not by individual funds; or (2) the Board determines that the matter affects more than one fund and all affected funds must vote. The Board may also determine that a matter only affects certain funds or classes of the Trust and thus that only those funds or classes are entitled to vote on the matter. Delaware law does not require the Trust to hold annual meetings of shareholders, and it is anticipated that shareholder meetings will be held only when specifically required by federal or state law. There are no conversion or preemptive rights in connection with shares of the Trust.

All shares, when issued in accordance with the terms of the offering, will be fully paid and non-assessable.

A shareholder in a fund is entitled to the shareholder's pro rata share of all distributions arising from that fund's assets and, upon redeeming shares, will receive the portion of the fund's net assets represented by the redeemed shares.

Shareholders representing 10% or more of the Trust's (or a fund's) shares may, as set forth in the Trust Instrument, call meetings of the Trust (or fund) for any purpose related to the Trust (or fund), including, in the case of a meeting of the Trust, the purpose of voting on removal of one or more Trustees.

Termination or Reorganization of Trust or its Series. The Board, may, without prior shareholder approval, change the form of organization of the Trust by merger, consolidation or incorporation, so long as the surviving entity is an open-end management investment company. Under the Trust Instrument, the Trustees may also, without shareholder vote, sell and convey all or substantially all of the assets of the Trust to another trust, partnership, association or corporation, or cause the Trust to incorporate in the State of Delaware, so long as the surviving entity is an open-end management investment company that will succeed to or assume the Trust's registration statement.

Under the Trust Instrument, the Board may sell or convey the assets of a fund or reorganize such fund into another investment company registered under the 1940 Act without a shareholder vote.

B. Fund Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is a shareholder who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Fund.

As of October 5, 2020, the Trustees and officers of the Trust in aggregate owned less than 1% of the outstanding shares of beneficial interest of the Fund.

As of October 5, 2020, certain shareholders listed in Table 8 in Appendix B owned of record or beneficially 5% or more of the shares of the Fund.

From time to time, certain shareholders may own a large percentage of the shares of the Fund. Accordingly, those shareholders may be able to greatly affect (if not determine) the outcome of a shareholder vote. As of October 5, 2020, the shareholders

listed in Table 8 in Appendix B who own more than 25% of the Fund may be deemed to control the Fund. “Control” for this purpose is the ownership of 25% or more of the Fund’s voting securities.

C. Limitations on Shareholders’ and Trustees’ Liability

Delaware law provides that Fund shareholders are entitled to the same limitations of personal liability extended to stockholders of private corporations for profit. In addition, the Trust Instrument contains an express disclaimer of shareholder liability for the debts, liabilities, obligations and expenses of the Trust. The Trust Instrument provides for indemnification out of each fund’s property of any shareholder or former shareholder held personally liable for the obligations of the relevant fund. The Trust Instrument also provides that the Trust, on behalf of a fund, shall, upon request, assume the defense of any claim made against any shareholder for any act or obligation of that fund and satisfy any judgment thereon. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which Delaware law does not apply, no contractual limitation of liability is in effect, and the Fund is unable to meet its obligations.

The Trust Instrument provides that the Trustees shall not be liable to any person other than the Trust and its shareholders. In addition, the Trust Instrument provides that the Trustees shall not be liable for any conduct whatsoever, provided that a Trustee is not protected against any liability to which he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office.

Any action brought by a shareholder related to the Fund must be brought in the Delaware Court of Chancery; Shareholders are not intended to be third-party beneficiaries of Fund contracts; and the Trust Instrument establishes certain procedures and limitations regarding shareholder lawsuits brought on behalf of the Trust.

D. Proxy Voting Procedures

The Trust’s and the Adviser’s proxy voting procedures are included in Appendices C and D, respectively.

Information regarding how the Fund voted proxies relating to portfolio securities during the 12-month period ended June 30 is available: (1) without charge, upon request, by contacting the Transfer Agent at (877) 3-AUXIER or (877) 328-9437 (toll free); and (2) on the SEC’s website at www.sec.gov.

E. Code of Ethics

The Trust and the Adviser have each adopted a code of ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities that may be purchased or held by the Fund. The Distributor relies on the principal underwriters exception under Rule 17j-1(c)(3), specifically where the Distributor is not affiliated with the Trust or the Adviser, and no officer, director or general partner of the Distributor serves as an officer, director or general partner of the Trust or the Adviser.

F. Registration Statement

This SAI and the Prospectus do not contain all of the information included in the Trust’s registration statement filed with the SEC under the 1933 Act with respect to the securities offered hereby. The registration statement, including the exhibits filed therewith, may be examined at the office of the SEC in Washington, D.C. The SEC maintains a website (www.sec.gov) that contains this SAI, any material incorporated by reference, and other information regarding the Fund.

G. Financial Statements

The Fund’s Financial Statements and Financial Highlights for the fiscal year ended June 30, 2020 are incorporated by reference into this SAI from the Fund’s Annual Report to shareholders, have been audited by BBD, an independent registered public accounting firm, as stated in its report, which is incorporated herein by reference, and have been so incorporated in reliance upon reports of such firm, given upon its authority as an expert in accounting and auditing.

APPENDIX A – DESCRIPTION OF SECURITIES RATINGS

Corporate and Municipal Long-Term Bond Ratings

Standard & Poor’s (“S&P”) Corporate and Municipal Long-Term Bond Ratings:

The following descriptions of S&P’s long-term corporate and municipal bond ratings have been published by Standard & Poor’s Financial Service LLC.

AAA - An obligation rated ‘AAA’ has the highest rating assigned by S&P. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

AA - An obligation rated ‘AA’ differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

A - An obligation rated ‘A’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

BBB - An obligation rated ‘BBB’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C - Obligations rated ‘BB’, ‘B’, ‘CCC’, ‘CC’, and ‘C’ are regarded as having significant speculative characteristics. ‘BB’ indicates the least degree of speculation and ‘C’ the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB - An obligation rated ‘BB’ is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

B - An obligation rated ‘B’ is more vulnerable to nonpayment than obligations rated ‘BB’, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

CCC - An obligation rated ‘CCC’ is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC - An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

C - An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D - An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

Plus (+) or Minus (-) - The ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR - This indicates that a rating has not been assigned or is no longer assigned.

Moody's Investors Service, Inc. ("Moody's") Long-Term Corporate Bond Ratings:

The following descriptions of Moody's long-term corporate bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

Aaa - Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa - Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A - Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa - Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess speculative characteristics.

Ba - Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B - Obligations rated B are considered speculative and are subject to high credit risk.

Caa - Obligations rated Caa are judged to be speculative, of poor standing and are subject to very high credit risk.

Ca - Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C - Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Moody's U.S. Municipal Long-Term Bond Ratings:

The following descriptions of Moody's long-term municipal bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.

Aaa - Issuers or issues rated Aaa demonstrate the strongest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Aa - Issuers or issues rated Aa demonstrate very strong creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

A - Issuers or issues rated A present above-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Baa - Issuers or issues rated Baa represent average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Ba - Issuers or issues rated Ba demonstrate below-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

B - Issuers or issues rated B demonstrate weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Caa - Issuers or issues rated Caa demonstrate very weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Ca - Issuers or issues rated Ca demonstrate extremely weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

C - Issuers or issues rated C demonstrate the weakest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating category from Aa through Caa. The modifier 1 indicates that the issuer or obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Fitch Ratings Ltd. ("Fitch") Corporate Bond Ratings:

The following descriptions of Fitch's long-term corporate bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

AAA - Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA - Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A - High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB - Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB - Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

B - Highly speculative. 'B' ratings indicate that material credit risk is present. For performing obligations, default risk is commensurate with the issuer being rated with an Issuer Default Rating ("IDR") in the ranges 'BB' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have extremely high recovery rates consistent with a Recovery Rating of 'RR1' (outstanding recovery prospects given default).

CCC - Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a superior recovery rate consistent with a Recovery Rating of 'RR2' (superior recovery prospects given default).

CC - Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a good recovery rate consistent with a Recovery Rating of 'RR3' (good recovery prospects given default).

C - Exceptionally high levels of credit risk. 'C' indicates exceptionally high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, and the rated obligation is expected to have an average, below-average or poor recovery rate consistent with a Recovery Rating of 'RR4' (average recovery prospects given default), 'RR5' (below average recovery prospects given default) or 'RR6' (poor recovery prospects given default).

Defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'B' to 'C' rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or Minus (-) The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' obligation rating category, or to corporate finance obligation ratings in the categories below 'B'.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms "investment grade" and "speculative grade" are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. "Investment grade" categories indicate relatively low to moderate credit risk, while ratings in the "speculative" categories either signal a higher level of credit risk or that a default has already occurred.

Fitch's Municipal Bond Long-Term Ratings:

The following descriptions of Fitch's long-term municipal bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

AAA - Highest credit quality. 'AAA' ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA - Very high credit quality. 'AA' ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A - High credit quality. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB - Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB - Speculative. 'BB' ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time.

B - Highly speculative. 'B' ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

CCC - Substantial credit risk. 'CCC' ratings indicate that default is a real possibility.

CC - Very high levels of credit risk. 'CC' ratings indicate default of some kind appears probable.

C - Exceptionally high levels of credit risk. 'C' ratings indicate default appears imminent or inevitable.

D - Default. 'D' ratings indicate a default. Default generally is defined as one of the following:

- failure to make payment of principal and/or interest under the contractual terms of the rated obligation;
- the bankruptcy filings, administration, receivership, liquidation or other winding-up or cessation of the business of an issuer/obligor; or
- the distressed exchange of an obligation, where creditors were offered securities with diminished structural or economic terms compared with the existing obligation.

Structured Finance Defaults – “Imminent” default, categorized under ‘C’, typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

Additionally, in structured finance transactions, where analysis indicates that an instrument is irrevocably impaired such that it is not expected to pay interest and/or principal in full in accordance with the terms of the obligation’s documentation during the life of the transaction, but where no payment default in accordance with the terms of the documentation is imminent, the obligation will typically be rated in the ‘C’ category.

Structured Finance Writedowns - Where an instrument has experienced an involuntary and, in the agency’s opinion, irreversible “writedown” of principal (*i.e.* other than through amortization, and resulting in a loss to the investor), a credit rating of ‘D’ will be assigned to the instrument. Where the agency believes the “writedown” may prove to be temporary (and the loss may be “written up” again in future if and when performance improves), then a credit rating of ‘C’ will typically be assigned. Should the “writedown” then later be reversed, the credit rating will be raised to an appropriate level for that instrument. Should the “writedown” later be deemed as irreversible, the credit rating will be lowered to ‘D’.

Notes: In the case of structured and project finance, while the ratings do not address the loss severity given default of the rated liability, loss severity assumptions on the underlying assets are nonetheless typically included as part of the analysis. Loss severity assumptions are used to derive pool cash flows available to service the rated liability.

Plus (+) or Minus (-) - The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ Long-Term Rating category, or to Long-Term Rating categories below ‘B’.

Municipal Short-Term Bond Ratings

S&P’s Municipal Short-Term Bond Ratings:

The following descriptions of S&P’s short-term municipal ratings have been published by Standard & Poor’s Financial Service LLC.

SP-1 - Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 - Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 - Speculative capacity to pay principal and interest.

D - ‘D’ is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody’s Municipal Short-Term Ratings:

The following descriptions of Moody’s short-term municipal ratings have been published by Moody’s Investors Service, Inc. and Moody’s Analytics Inc.

MIG 1 - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Fitch's Municipal Short-Term Credit Ratings:

The following descriptions of Fitch's municipal short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

F1 - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2 - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C - High short-term default risk. Default is a real possibility.

RD - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

D - Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Short-Term Credit Ratings

S&P's Short-Term Credit Ratings:

The following descriptions of S&P's short-term credit ratings have been published by Standard & Poor's Financial Service LLC.

A-1 - A short-term obligation rated 'A-1' is rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 - A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 - A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B - A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitments.

C - A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D - A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

Dual Ratings – Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, ‘AAA/A-1+’ or ‘A-1+/A-1’). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, ‘SP-1+/A-1+’).

Moody’s Short-Term Ratings:

The following descriptions of Moody’s short-term credit ratings have been published by Moody’s Investors Service, Inc. and Moody’s Analytics Inc.

P-1 - Issuers (or supporting institutions) rated Prime-1 have a superior ability to honor short-term debt obligations.

P-2 - Issuers (or supporting institutions) rated Prime-2 have a strong ability to honor short-term debt obligations.

P-3 - Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to honor short-term obligations.

NP - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Fitch’s Short-Term Ratings:

The following descriptions of Fitch’s short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.

F1 - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

F2 - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F3 - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C - High short-term default risk. Default is a real possibility.

RD - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

D - Default. Indicates a broad-based default event for an entity, or the default of a specific short-term obligation.

The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ Long-term rating category, to categories below ‘CCC’, or to Short-term ratings other than ‘F1’. (The +/- modifiers are only used to denote issues within the CCC category.)

APPENDIX B – MISCELLANEOUS TABLES**Table 1 – Investment Advisory Fees**

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived and/or expenses reimbursed by the Adviser, if any, and the actual fees retained by the Adviser. The data is for the last three fiscal years.

Year Ended	Advisory Fees Accrued	Advisory Fees Waived and/or Expenses Reimbursed	Advisory Fees Received
June 30, 2020	\$1,789,013	\$378,795	\$1,410,218
June 30, 2019	\$1,885,545	\$351,625	\$1,533,920
June 30, 2018	\$2,005,321	\$327,675	\$1,677,646

Table 2 – Sales Charges (A Shares)

The following table shows the dollar amount of aggregate sales charge received by the Distributor, the amount the Distributor set aside to be used solely for distribution-related expenses, and the amount reallocated to financial institutions in connection with purchases of the Fund’s A Shares. The data is for the last three fiscal years.

Year Ended	Aggregate Sales Charge	Sales Charge Received	Sales Charge Reallocated
June 30, 2020	\$11,872	\$2,572	\$9,300
June 30, 2019	\$11,242	\$1,711	\$9,531
June 30, 2018	\$1,694	\$294	\$1,400

Table 3 – Distribution Fees (A Shares)

The following table shows the dollar amount of the fees accrued by the applicable class, pursuant to the 12b-1 Distribution Plan, the amount of fee that was waived by the Distributor or its agents, if any, and the actual fees received by the Distributor or its agents. The data is for the last three fiscal years.

Year Ended	Plan Fees Accrued	Plan Fees Waived	Plan Fees Received
June 30, 2020	\$6,765	\$0	\$6,765
June 30, 2019	\$7,041	\$0	\$7,041
June 30, 2018	\$7,118	\$0	\$7,118

Table 4 – Administration Fees

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived by Apex Fund Services, if any, and the actual fees retained by Apex Fund Services. The data is for the last three fiscal years.

Year Ended	Administration Fees Accrued	Administration Fees Waived	Administration Fees Received
June 30, 2020	\$308,289	\$87,752	\$220,537
June 30, 2019	\$317,267	\$88,285	\$228,982
June 30, 2018	\$328,563	\$89,049	\$239,514

Table 5 – Commissions

The following table shows the aggregate brokerage commissions of the Fund. The data is for the last three fiscal years.

Year Ended	Aggregate Brokerage Commissions (\$) Paid	Total Brokerage Commissions (\$) Paid to Affiliate of Fund, Adviser or Distributor	% of Brokerage Commissions Paid to Affiliate of Fund, Adviser or Distributor	% of Transactions Executed by Affiliate of Fund, Adviser or Distributor
June 30, 2020	\$10,677	\$0	0%	0%
June 30, 2019	\$12,557	\$0	0%	0%

Year Ended	Aggregate Brokerage Commissions (\$) Paid	Total Brokerage Commissions (\$) Paid to Affiliate of Fund, Adviser or Distributor	% of Brokerage Commissions Paid to Affiliate of Fund, Adviser or Distributor	% of Transactions Executed by Affiliate of Fund, Adviser or Distributor
June 30, 2018	\$10,508	\$0	0%	0%

Table 6 – Directed Brokerage

The following table lists the Fund’s directed brokerage in return for research services, the amount of transactions so directed and the amount of commissions generated therefrom. The data is for the fiscal year ended June 30, 2020.

Amount Directed	Amount of Commissions Generated
\$6,463,548	\$10,677

Table 7 – Securities of Regular Brokers or Dealers

The following table lists the Fund’s regular brokers and dealers whose securities (or the securities of the parent company) were acquired during the past fiscal year and the aggregate value of the Fund’s holdings of those securities as of the most recent fiscal year ended June 30, 2020.

Regular Broker or Dealer	Value of Securities Held
N/A	N/A

Table 8 - Control Persons and 5% Shareholders

The following table lists as of October 5, 2020: (1) the shareholders who owned 25% or more of the outstanding shares of the applicable class and thus may be deemed to control the Fund; and (2) the persons who owned beneficially or of record 5% or more of the outstanding shares of the applicable class. The Fund believes that these shares were owned of record by such holders for their fiduciary, agency or custodial accounts.

Shareholder Voting Policy**

As of December 14, 2012

SECTION 1. BACKGROUND

The Trust exercises its shareholder voting responsibilities as an investor in other issuers as a fiduciary, with the goal of maximizing the value of the Trust's and its shareholders' investments. This Policy details the Trust's policy with respect to shareholder voting.

SECTION 2. ADVISER RESPONSIBILITIES

(A) Delegation by Board. Each Fund has delegated to the Adviser the authority to vote as a shareholder of issuers whose securities are held in its portfolio. The Adviser shall maintain and the Board shall approve voting procedures related to the Adviser acting on behalf of the Fund in accordance with its fiduciary duties and the best interests of Fund shareholders.

(B) Delivery of Proxies. The Adviser is responsible for coordinating the delivery of proxies to be voted by the Custodian to the Adviser or to an agent of the Adviser selected by the Adviser to vote proxies with respect to which the Adviser has such discretion (a "Proxy Voting Service"). Upon request, the Adviser shall provide periodic reports to the Board as to the implementation and operation of its shareholder voting policies and procedures as they relate to the Trust.

(C) Conflicts of Interest. The Trust recognizes that under certain circumstances an Adviser or Proxy Voting Service may have a conflict of interest in voting on behalf of a Fund. A conflict of interest includes any circumstance when the Fund, the Adviser, the Distributor, the Proxy Voting Service or one or more of their Affiliated Persons (including officers, directors and employees) knowingly does business with, receives compensation from, or sits on the board of, a particular issuer or closely affiliated entity, and, therefore, may appear to have a conflict of interest between its own interests and the interests of Fund shareholders in how shares of that issuer are voted.

Each Adviser is responsible for maintaining procedures to identify and address material conflicts of interest and, when applicable, determine the adequacy of a Proxy Voting Service's procedures to identify and address material conflicts of interest.

(D) Voting Record. The Adviser shall be responsible for ensuring a voting record is maintained that includes all instances where the Fund was entitled to vote and will coordinate the annual delivery of such record to the Administrator for purposes of preparing the Trust's annual Form N-PX filing. The voting record shall include the following information required to be reported in Form N-PX:

- (1) The name of the issuer of the security;
- (2) The exchange ticker symbol of the security;
- (3) The CUSIP for the security;
- (4) The shareholder meeting date;
- (5) A brief identification of the matter voted on;
- (6) Whether the matter was proposed by the issuer or by a security holder;
- (7) Whether the Trust cast its vote on the matter;
- (8) How the Trust cast its vote (*e.g.*, for or against proposal, or abstain; for or withhold regarding election of directors); and
- (9) Whether the Trust cast its vote for or against management.

The Adviser shall also be responsible for ensuring information regarding how the Fund voted relating to portfolio securities during the twelve-month period ended June 30 is available on the Fund's website or other location consistent with disclosure in the Fund's registration statement.

SECTION 3: ABSTENTION

The Trust and an Adviser may abstain from shareholder voting in certain circumstances. Abstaining from voting may be appropriate if voting would be unduly burdensome or expensive, or otherwise not in the best interest of a Fund's shareholders.

SECTION 4: BOARD REPORTING AND REVIEW

(A) The Adviser shall submit its voting procedures to the Board for review and approval initially and at the next regularly scheduled meeting of the Board following any material change.

(B) The Adviser shall report to the Board, at least quarterly, whether any conflicts of interest arose while voting as an investor in other issuers and how such conflicts were handled.

**Auxier Asset Management LLC
IA Policies and Procedures Manual
4/4/2019 to Current**

PROXY VOTING

Policy

Auxier Asset Management LLC, as a matter of policy and as a fiduciary to our clients, has responsibility for voting proxies for portfolio securities consistent with the best economic interests of the clients. Our firm maintains written policies and procedures as to the handling, research, voting and reporting of proxy voting and makes appropriate disclosures about our firm's proxy policies and practices. Our policy and practice includes the responsibility to monitor corporate actions, receive and vote client proxies and disclose any potential conflicts of interest as well as making information available to clients about the voting of proxies for their portfolio securities and maintaining relevant and required records.

Background

Proxy voting is an important right of shareholders and reasonable care and diligence must be undertaken to ensure that such rights are properly and timely exercised.

Investment advisers registered with the SEC, and which exercise voting authority with respect to client securities, are required by Rule 206(4)-6 of the Advisers Act to (a) adopt and implement written policies and procedures that are reasonably designed to ensure that client securities are voted in the best interests of clients, which must include how an adviser addresses material conflicts that may arise between an adviser's interests and those of its clients; (b) to disclose to clients how they may obtain information from the adviser with respect to the voting of proxies for their securities; (c) to describe to clients a summary of its proxy voting policies and procedures and, upon request, furnish a copy to its clients; and (d) maintain certain records relating to the adviser's proxy voting activities when the adviser does have proxy voting authority.

Staff Legal Bulletin No. 20 was jointly published by the SEC's Division of Investment Management and Division of Corporation Finance on June 30, 2014. The Division of Investment Management provided guidance about investment advisers' responsibilities in voting client proxies and retaining proxy advisory firms, while the Division of Corporation Finance addressed the availability and requirements of two exemptions to the federal proxy rules that are often relied upon by proxy advisory firms.

Responsibility

Rita Miller has the responsibility for the implementation and monitoring of our proxy voting policy, practices, disclosures and record keeping, including outlining our voting guidelines in our procedures.

Procedure

Auxier Asset Management LLC has adopted procedures to implement the firm's policy and conducts reviews to monitor and ensure the firm's policy is observed, implemented properly and amended or updated, as appropriate, which include the following:

Voting Procedures

- All employees will forward any proxy materials received on behalf of clients to Rita Miller;
- Rita Miller will determine which client accounts hold the security to which the proxy relates;
- Absent material conflicts, Jeff Auxier will determine how Auxier Asset Management LLC should vote the proxy in accordance with applicable voting guidelines. Rita Miller shall complete the proxy and vote the proxy in a timely and appropriate manner.

Disclosure

- Auxier Asset Management LLC will provide required disclosures in response to Item 17 of Form ADV Part 2A summarizing this proxy voting policy and procedures, including a statement that clients may request information regarding how Auxier Asset Management LLC voted a client's proxies, and that clients may request a copy of the firm's proxy policies and procedures.
- Rita Miller will also send a copy of this summary to all existing clients who have previously received Auxier Asset Management LLC's Form ADV Part 2; or Rita Miller may send each client the amended Form ADV Part 2.

Client Requests for Information

- All client requests for information regarding proxy votes, or policies and procedures, received by any employee should be forwarded to Lillian M. Widolff.
- In response to any request, Lillian M. Widolff will prepare a written response to the client with the information requested, and as applicable will include the name of the issuer, the proposal voted upon, and how Auxier Asset Management LLC voted the client's proxy with respect to each proposal about which the client inquired.

Voting Guidelines

- In the absence of specific voting guidelines from the client, Auxier Asset Management LLC will vote proxies in the best interests of each particular client. Auxier Asset Management LLC's policy is to vote all proxies from a specific issuer the same way for each client absent qualifying restrictions from a client. Clients are permitted to place reasonable restrictions on Auxier Asset Management LLC's voting authority in the same manner that they may place such restrictions on the actual selection of account securities.
- Auxier Asset Management LLC will generally vote in favor of routine corporate housekeeping proposals such as the election of directors and selection of auditors absent conflicts of interest raised by an auditors non-audit services.
- Auxier Asset Management LLC will generally vote against proposals that cause board members to become entrenched or cause unequal voting rights.
- In reviewing proposals, Auxier Asset Management LLC will further consider the opinion of management and the effect on management, and the effect on shareholder value and the issuer's business practices.

Conflicts of Interest

- Auxier Asset Management LLC will identify any conflicts that exist between the interests of the adviser and the client by reviewing the relationship of Auxier Asset Management LLC with the issuer of each security to determine if Auxier Asset Management LLC or any of its employees has any financial, business or personal relationship with the issuer.
- If a material conflict of interest exists, Rita Miller will determine whether it is appropriate to disclose the conflict to the affected clients, to give the clients an opportunity to vote the proxies themselves, or to address the voting issue through other objective means such as voting in a manner consistent with a predetermined voting policy or receiving an independent third party voting recommendation.
- Auxier Asset Management LLC will maintain a record of the voting resolution of any conflict of interest.

Recordkeeping

Rita Miller shall retain the following proxy records in accordance with the SEC's five-year retention requirement.

- These policies and procedures and any amendments;
- Each proxy statement that Auxier Asset Management LLC receives;

- A record of each vote that Auxier Asset Management LLC casts;
- Any document Auxier Asset Management LLC created that was material to making a decision how to vote proxies, or that memorializes that decision including periodic reports to Rita Miller or proxy committee, if applicable.
- A copy of each written request from a client for information on how Auxier Asset Management LLC voted such client's proxies, and a copy of any written response.
